Acknowledgement

Thanks God, the merciful and the passionate, for providing me the opportunity to step in the excellent world of science. To be able to step strong and smooth in this way, I have also been supported and supervised by many people to whom I would like to express my deepest gratitude.

After thanking God, who gave me the power to finish this work, I would like to express my sincere gratitude to my advisor Prof. V. K. Jain for his myriad contributions for my Ph.D study and research, for his patience, motivation, enthusiasm and immense knowledge. I would like to express my deep appreciation to him for his vividious supervision and encouragement during the research journey. His valuable suggestions made this work interesting and a learning experience for me. His focussed guidance helped me during the research and writing of this thesis. I owe him a lot to be mentioned.

You've been my friend, my mentor, my confidant, my colleague, and a never-ending fount of moral support. You have given so much of yourself to help me succeed. I could not have imagined having a better advisor and mentor for my Ph.D study.

This thesis is the beginning rather than end of my long eventful journey in obtaining my degree in International Relations and exploring more what I have been imbued with. I have not traveled in a vacuum in this journey. There are some people who made this journey easier with words of encouragement and more intellectually satisfying by offering different places to look to explicit my ideas and expand my theories. It is a pleasant aspect that I have now the opportunity to express my gesture of thankfulness for all of them.

I would like to thank Mrs. Ripu Daman Jain who provided me with her invaluable advice and comments on both my research and my future research career plans. I also convey my earnest appreciation for her affection and concern showered on me.

I would like to thank my sisters Anjali and Priti for all their love and support over the years, during this venture and for their enormous encouragement and faith in my ability to accomplish the degree program.

This work could not have been done without the continuous advice and support of Prof. Y. K Agrawal, who guided me throughout the research with a lot of understanding and encouragement. His insight into organic and supramolecular chemistry has set me on the right track, confront and innovative ideas and helped me to avoid a lot of obstacles and pitfalls that appeared in the course of the work. For all of this I express him my deepest gratitude.

I take this opportunity to thank Prof. (Mrs.) S.K. Menon for her suggestions and wholehearted support during the entire tenure of my study. This is the perfect moment for me to express my gratification for her thorough cooperation and guidance at every step of my study and when I will be exploring new horizons with the knowledge I had gained from you. I am thankful to her for providing me the facilities to carry out the work.

I would be failing in my duties if I don't mention the names of Dr. Gitesh Shah, Mr. Raghuvir Mehta and Prof. R.Y. Gupta who have always been showing me the path of optimism. I am heartily obliged for their encouragement and motivation.

I would also like to express my thanks to my research group, my seniors and erudites Dr. Shakil Sait, Dr. Anand Handa, Dr. Rujul Pandya, Dr. Shibu Pillai, Dr. Hiren Mandalia and Dr. Parin Kanaiya for their valuable suggestions and support. I have learned so much from all of them from figuring out what research is, to opt for a research agenda, to acquire the learning and presentation skills.

I owe a loving thanks to my lab mates Bharat Makwana, Disha Vyas, Keyur Bhatt, Divya Mishra and Savan Darjee for their endless encouragement, moral support and fruitful discussions.

vi
will always keep my colleagues in hearty touch for creating joyful and fantastic environment in laboratory to work at any time.

I’ve also been fortunate to have a great group of friends. This includes Arpan Acharya, Bharat Dobariyal, Dhaval Shah, Krunal Mehta, Naman Nanavati, Neha Jhala and Tatsat Pradhan. They had not only been my mates for discussions of my research work, but also the confidants on whom I could rely for valuable suggestions and who could stand by me through thick and thin. This I believe is the key to getting through a Ph.D. program - having good friends to have fun with and complain to.

I would like to thank CSMCRI, Bhavnagar; CDRI, Lucknow; SAIF, Mumbai; for providing the spectral & elemental analysis data of my samples. I acknowledge Chemical testing centre (CTC) laboratory, GI DC, Vatva for providing facilities of dyeing. Prof. S.R. Dave, Mitesh & Bhargav for helping me with the antimicrobial studies and instrument facilities. I would like to make a special mention of UGC for providing me financial assistance to carry out this work.

I extend my thanks to the entire non-teaching staff of Chemistry department & the administrative staff of Gujarat University whose help cannot be seen in implicit way. I am also thankful to Inflibnet, which provided a great source of help for accessing the e-journals. I also wish to thank Mr. Dayan for providing me some valuable chemicals and glass wares necessary for the research work.

Lastly, I would like to thank my all my family members for their love and encouragement pursuance of this research which would have been an imponderable task for me without their support. For my parents Sharad Gupte, Usha Gupte and my uncle Mr. Vijay Gupte, Mr. Krishnakumar Gupte who raised me with a passion of science and supported me in all my pursuits and because of their hunger desire and dedication towards education I have been successful in achieving my goals and accomplishing their dream and my aspirations.

Last but not the least; I would end by rendering all the credit of the perfections in my thesis to God and all the above mentioned well wishes. With the completion of my degree program I will endeavour to implement my knowledge in the aspects of enhancement in the field of science for future aspirers.

Hrishikesh S. Gupte
