ACKNOWLEDGEMENTS

I can only express this acknowledgment by my deep sense of indebtedness to my revered and learned teacher Dr. U.M. Rawal, who with singleness of purpose, stood behind me and was a fountainhead of moral support. But for his untiring guidance, valuable criticisms, constant encouragement and inspiration at all times and at all the stages, I may not have been able to do justice to this study.

I am also grateful to Dr. V.C. Shah, Professor & Head of the Zoology Department and Director, University School of Sciences, for providing necessary laboratory facilities.

My hearty thanks are due to Professor V. Kalavar and Dr. O.A. Khanna of M & J Institute of Ophthalmology, Civil Hospital, Ahmedabad and Dr. Ramsh J. Desai, Eye Hospital, Ram Nivas, Khanpur, Ahmedabad for the procurement of normal and cataractous human lenses.

I am thankful to the authorities of Gujarat University Computer Centre for extending facilities for the analysis of my data. I am also thankful to Dr. P.S. Datta and Mr. S. Sorin of Physical Research Laboratory, Ahmedabad for their help in using the Liquid Scintillation Counter and Atomic Absorption Spectrophotometer.

I render my thanks to my friend Mr. N. Chandrasekhar Nair for his co-operation throughout the period.
The allotment of Gujarat State Government Scholarship to me during the tenure of this work is acknowledged.

Special appreciation goes to Mr. G. Sanath Kumar for his skillful typing of the manuscript of this thesis.
