It is some more addition to the works of several research persons on "SOME PROBLEMS ON FIXED POINT THEOREMS"
I had an opportunity to work on it. In the pursuit of the said effort I had one great veteran of the subject Dr. S.K. Shrivastava Professor and Head, Department of Mathematics and Statistics Dr. H.S. Gour Vishwavidyalaya, Sagar, who blessed me being my supervisor and guide. He gave me the deep insight without pains. His easy availability was the soul cause of encouragement. His simple, humble and affectionate guidance is far beyond gratitudes, I can pay. His affection and guidance will be blissful memory for me. I am also thankful to Mrs. Preeti Shrivastava for her blessing and moral support.

Dr. P.L. Sharma, Sagar was the person who lit the torch for me and showed me the path. I am highly obliged to him.

Dr. K. Qureshi, Principal, Girls Degree College Narsinghpur, is my most beloved and esteemed teacher. I pay my gratitudes to him.
Another senior, a philosopher friend, Fellow of CSIR, Dr. Rajesh Pande had taken long painstaking course without hitch for me. I feel proud to thank him for his help.

I also pay my thanks to my Principal, Shri R.K. Shrivastava, S.D.M. Govt. Girl's Higher Secondary School, Narsinghpur and his staff. My numerous friends and fellow researchers do need to be thanked, with due apologies.

Consistently I was watched rather preserved, by one, for higher, harder and greater work, keeping alive the memory of my reverend Father in me, is my HOLY MOTHER, Smt. Shanti Devi Sharma, I kneel down for her patience and inspiration.

My elder Brothers and Bhabhies who toiled a lot and supported me in my hard days. I pay my best regards to them.

My wife Smt. Sangeeta Sharma, a shortly joined companion also patiently contributed to keep me going straight and soothing in my path, I thank her too.

This Thesis consists of eight chapters which were typed by Sudhir Patel and my little niece Ku. Seema Sharma. My due thanks to them too for perfect and prompt typing.
The contents of chapters included in this Thesis are published or accepted for publication in various Mathematical Journals.

I wish my work may be of some use to persons in the similar pursuit.
