PREFACE

The material of the present thesis is based on the researches which I have been carrying on since 1951 at the University of Saugar on "The summability of Fourier series" under the guidance of Prof. M.L. Misra, M.A., D.Sc., Head of the Department of Mathematics, University of Saugar, Saagar.

The present dissertation contains nine chapters. The contents of chapters VIII and IX have already been published in the form of papers in the Duke Mathematical Journal and the Proceedings of the American Mathematical Society respectively, while those of some other chapters have been communicated for publication.

It is with deep sense of gratitude that I take this opportunity of acknowledging my indebtedness to Prof. M.L. Misra for his valuable guidance and generous help.

Basudeo Singh
