ACKNOWLEDGEMENT

I am highly grateful to Professor J. J. Chinoy, M.Sc., Ph.D., (London), D.I.C., F.N.A.Sc., Professor and Head, Botany Department, for suggesting the problem as well as for his valuable guidance, encouragement and constructive counsel at every stage of this work.

I am also highly indebted to Dr. B.M. Jani for his valuable help during this work. I wish to express my sincere thanks to my colleagues Miss A.V. Vyas, Dr. D. John, Dr. H.D. Patel and Mr. Y.D. Singh for their help in the biochemical determinations. Thanks are also due to Drs. C.K. Shah and B.S. Vaidya for their help and cooperation.

The work presented in this Thesis forms a part of the studies on "Physiological studies of drought resistance in some Indian and American varieties of barley" under the U.S.D.A., P.L. 480 Research Project. The financial assistance in the form of Jr. Research Fellowship by U.S.D.A. in the beginning and later the Research Scholarship from Gujarat Government is gratefully acknowledged.

(K.P. SUNDAR RAJ)
