TABLE OF CONTENTS

CHAPTER I - INTRODUCTION .................................................. 1

CHAPTER II - REVIEW OF LITERATURE .................................... 12
  Seed Germination .......................................................... 12
  Growth and Development in relation to Drought ....................... 18
  Enzymes and Water Relations ........................................... 22
  Nucleic Acid Metabolism ................................................ 27
  Protein Metabolism ..................................................... 35
  Free Amino Acids ....................................................... 43
  Carbohydrate Metabolism ............................................... 46
  SH (Sulphydryl) and SS (Disulphide) Contents in relation to Drought 55
  Effect of Low Temperature ............................................. 57
  Protoplasmic Changes .................................................. 58
  Nucleus and Nucleic Acids ............................................. 58
  Proteins and Amino Acids ............................................. 61
  Enzyme Activity ....................................................... 65
  Carbohydrate Metabolism ............................................... 67

CHAPTER III - MATERIALS AND METHODS .................................. 70
  Experiment I - Effect of various osmotica on the Biochemical Changes Associated with Germination in Wheat and Blackgram 70
  Experiment II - Effect of Desiccation on the Metabolic Changes in the Germinated Wheat and Blackgram Seedlings 73
  Experiment III - Effect of Low Temperature on the Metabolic Drifts and Enzymic Activities in the Germinated Wheat and Blackgram Seedlings 75

CHAPTER III (a) - EXPERIMENTAL METHODS AND PROCEDURES .......... 78
  Fresh weight, Dry weight and Per cent (%) Moisture Determinations (For Expt. I) 78
  Fresh weight, Desiccated weight and Per cent (%) Moisture loss Determinations (For Expt. II) 78
  Extension growth of Seedlings ......................................... 79
  Estimation of Starch .................................................. 80
  Estimation of Sugar ................................................... 82
Estimation of Protein
Estimation of Histone
Estimation of Nucleic Acids (RNA & DNA)
Amylase Activity
Invertase Activity
Protease Activity
RNase Activity
Catalase Activity
Peroxidase Activity
Statistical Analysis

CHAPTER IV - EXPERIMENTAL FINDINGS ON WHEAT SEEDLINGS

Experiment I - Effect of Different Osmotica on the Biochemical Changes during the Germination of Wheat Seedlings
Statistical Analysis of the Results (Table I)

Experiment II - Effect of Desiccation on the Metabolic Changes in the Germinated Wheat Seedlings
Statistical Analysis of the Results (Table II)

Experiment III - Effect of Low Temperature on the Metabolic Changes and Enzymic Activities in the Germinated Wheat Seedlings
Statistical Analysis of the Results (Table III)

CHAPTER V - DISCUSSION OF FINDINGS ON WHEAT SEEDLINGS

Experiment I - Effect of Different Osmotica on the Metabolism of Wheat Seedlings during Germination
Germination
Carbohydrate Metabolism
Protein Metabolism
Histones and Nucleic Acid Metabolism
Oxidizing Enzymes
Experiment II - Effect of Desiccation
Treatments on the Metabolism of the Germinated Wheat Seedlings 176
% Moisture Loss & Desiccated Weight 176
Carbohydrate Metabolism 177
Protein Metabolism 183
Nucleic Acid Metabolism 187
Oxidizing Enzymes 189

Experiment III - Effect of Low Temperature on the Metabolism in the Germinated Wheat Seedlings 191
Carbohydrate Metabolism 192
Protein Metabolism 197
Nucleic Acid Metabolism 198
Oxidizing Enzymes 200

CHAPTER VI - SUMMARY OF STUDIES ON WHEAT SEEDLINGS 203
Experiment I 203
Experiment II 209
Experiment III 214

CHAPTER VII - EXPERIMENTAL FINDINGS ON BLACKGRAM SEEDLINGS 219
Experiment I - Effect of Different Osmotics on the Biochemical Changes during the Germination of Blackgram Seedlings 219
Statistical Analysis of the Results (Table IV) 240

Experiment II - Effect of Desiccation on the Metabolic Changes in the Germinated Blackgram Seedlings 242
Statistical Analysis of the Results (Table V) 257

Experiment III - Effect of Low Temperature and the Metabolic Changes and Enzymic Activities in the Germinated Seedlings 258
Statistical Analysis of the Results (Table VI) 269
CHAPTER VIII - DISCUSSION OF FINDINGS ON BLACKGRAM SEEDLINGS

Experiment I - Effect of Different Osmotica on the Metabolism of Blackgram Seedlings during Germination

Germination 272
Protein Metabolism 278
Nucleic Acid Metabolism 283
Carbohydrate Metabolism 286
Oxidizing Enzymes 291

Experiment II - Effect of Desiccation Treatments on the Metabolism of the Germinated Blackgram Seedlings

Desiccated Weight and Per cent (%) Moisture Loss 294
Carbohydrate Metabolism 295
Protein Metabolism 298
Nucleic Acid Metabolism 300
Oxidizing enzymes 301

Experiment III - Effect of Low Temperature Treatments on the Metabolism of the Germinated Blackgram Seedlings

Carbohydrate Metabolism 303
Protein Metabolism 304
Nucleic Acid Metabolism 305
Oxidizing Enzymes 306

CHAPTER IX - SUMMARY OF STUDIES ON BLACKGRAM SEEDLINGS 310

Experiment I 310
Experiment II 318
Experiment III 323

CHAPTER X - CONCLUSIONS 328

BIBLIOGRAPHY 338
