LIST OF TABLES

Table No. | Description                                                                 | Page
----------|------------------------------------------------------------------------------|-----
3.1       | Estimation of Sectoral Gross Value Added Coefficients (At Factor Cost)       | 75  
3.2       | Estimation of Sectorwise Depreciation in Registered Manufacturing Sector     | 80  
3.3       | Estimation of Sectorwise Depreciation in Unregistered Manufacturing for 1971-72 | 83  
3.4       | Estimation of Net Value Added Ratios                                        | 85  
3.5       | Estimation of Corporate Tax Coefficient for the Year 1971-72                 | 88  
3.6       | Allocation of Net Value Added Originated in all Non-Manufacturing and Registered Manufacturing Sectors to rural and urban area (for the year 1971-72) | 93  
3.7       | Allocation of Net Value Added Originated in Unregistered Manufacturing to Rural and Urban Areas (for the year 1971-72) | 96  
3.8       | Estimation of Workers in Registered Manufacturing Sectors                    | 99  
3.9       | Estimation of Sectoral Income Tax Incidence by Areas                         | 103 
3.10      | Estimation of Disposable Income Coefficients by Areas                       | 106 
3.11      | The Estimation of the Parameters of Lognormal Distribution used in Fifth Plan (1973-74) | 110 
3.12      | Estimation of Average Expenditure of Per-capita Monthly Expenditure 1973-74  | 112 
3.13      | Regression Estimates of the Sectoral Consumption Function in Rural and Urban Areas | 114 
3.14      | Estimates of Consumption Coefficients (Rural Areas) at Factor Cost           | 121

4.7 Comparison of Results Obtained for Class A Cities by the Pareto and Lognormal Distribution

4.8 Results of three Parameter Lognormal Distribution as 'Estimated for Pooled Data', Newton Raphson and Scoring Method

4.9 Results of Lognormal Distribution by Scoring Method; Observed and Expected Frequencies

4.10 Conversion of Fifth Plan Per Capita Monthly Expenditure Classes into Corresponding Family Income Classes (at 1971-72 Prices)

4.11 Estimation of Annual Personal Consumption Expenditure of Union Government Employees Corresponding to Fifth Plan Income Classes

4.12 Estimation of Sectoral Consumption of the Union Government Employees

4A-1 Decomposition of Central Government Expenditure into Some Economic Categories

4A-2 Areawise Distribution of Government Employees according to Basic Pay Range

4A-3 Allowance Rates Used

4A-4 Conversion of Basic Pay into Estimated Total Emoluments

4A-5 Estimation of Average Income of Fifth Plan Income Classes

5.1 Sectoral Income Multipliers by Areas

5.2.1 Income Multipliers of Commodity Expenditures by Areas
5.2.2 Income Multipliers of Salary Disbursals by Areas

5.2.3 Income Multipliers by Total Expenditure by Areas

5.3.1 Commodity Requirements of Expenditure on Commodity Purchases

5.3.2 Commodity Requirements of Salary Disbursals

5.3.3 Commodity Requirements of Total Expenditures

5.4 Sectoral Employment Multipliers

5.5.1 Employment Requirements of the Expenditure on Commodity Purchases

5.5.2 Employment Requirements of Salary Disbursals

5.5.3 Employment Requirements of Total Expenditures

5.6 Sectoral Import Multipliers

5.7.1 Import Requirements of Rs. Thousand Expenditure on Commodity Purchases

5.7.2 Import Requirements of Rs. one thousand Expenditure on Salary Disbursals

5.7.3 Import Requirements of Rs. one thousand Total Expenditure

5.8 Tax Feed-back Via Excise Duty Per Thousand Rs. Expenditure
5.9 Tax Feed-back Via Import Duty Per Thousand Rs. Expenditure 326
5.10 Tax Feed-back Via Income Tax Per Thousand Rs. Expenditure 328
5.11 Tax Feed-back per Thousand Rs. Expenditure 331
5.12 Summary Picture of the Impact of Union Government Expenditure on Various Macroeconomic Aggregates 332
6.1.1 Partial Multipliers When Agriculture is a Bottleneck Sector 344
6.1.2 Partial Multipliers When Electricity is a Bottleneck Sector 346
6.1.3 Partial Multipliers When Railway Transport is a Bottleneck Sector 347
6.1.4 Partial Multipliers When Electricity and Railway Transport are Bottleneck Sectors 348
6.1.5 Partial Multipliers When Both Agriculture and Electricity are Bottleneck Sectors 349
6.1.6 Partial Multipliers When Agriculture and Railway Transport are Bottleneck Sectors 350
6.1.7 Partial Multipliers When Agriculture, Electricity and Railway Transport are Bottleneck Sectors 351
6.2 General Income Multipliers of Union Government Expenditure under Alternative Bottleneck Situation 353
6.3 Sectoral Price Movements Induced by an Additional Outlay of Rs. 500 crores 367
Appendix 6.1  Allocation Coefficient Matrix
            Estimated from the Fifth Plan
            Domestic Coefficient Matrix

7.1  Sectoral Balanced Budget Multipliers Due to a Change in Income Tax

7.2  Sectoral Balanced Budget Multipliers Due to a Change in Excise Duty

7.3  General Balanced Budget Multipliers of Government Expenditure Financed by a Change in Income Tax Incidence on Different Sectors

7.4  General Balanced Budget Multipliers of Government Expenditure Financed by Excise Duties on Different Sectors.
