ACKNOWLEDGEMENTS

I wish to express my deep sense of gratitude and appreciation for the expert guidance, constant encouragement and keen interest shown by my thesis adviser, Professor P.I. John throughout this investigation. I considered it a privilege to have been associated with him in carrying out the thesis work. I am grateful to him.

It is a pleasure to acknowledge the advice and helpful discussions with Professor Y.C. Saxena and Dr. S.K. Mattoo. My sincere thanks are due to Dr. A.M. Punithavelu for his help, especially during the initial stages of the experiment and for his frank comments and suggestions. I wish to thank Professors P.K. Kaw, A. Sen and A.K. Sundaram for the discussions that proved to be very valuable in this work.

I owe immensely to my colleagues Sekar, Venkat and Dhiraj for their co-operation and the lively discussions I had with them. Their friendly help and nice company made my period of the thesis work a pleasant one.
My thanks are due to Mr. Pathak who was always available to render me assistance. I express my sincere thanks to Messrs. Lali, Pujara, Bhatt, Suthar, Shaikh and Vinchi for their technical assistance at various phases of the experiment.

A thank you goes out to Ashok, Ambastha, Avinash, Chitra, Gopa, Goswami, Harish, Hussain, Kar, KK, Manab, Mohan, Nautiyal, Patro, Pawar, Pankaj, Rajesh, Rhama, Rao, Sahu, Syamlal and Neeraj for the friendly atmosphere provided by them. Special thanks are due to Chandra for his great help through reprints and good humour. Thanks are due to Velu for the critical perusal of the manuscript and to Sekar and Anand for their help in proof-reading.

I would like to express my gratefulness to the personnel of the Library, Workshop, Drafting and Photography sections for their co-operation and help during the course of the work. Thanks are extended to Mr. Ravindran Nair for typing this thesis with his fantastic speed and to Mr. Murlidhar for the neat cyclostyle.

Finally, I am indebted to my wife, Hema (who for a while suspected that this work would go on forever), for her patience and understanding.
