Appendix I - Abstract of paper "Comparison of ozone amounts measured at Delhi (28°N), Srinagar (34°N) and Tateno (36°N) in 1957-58"

Appendix II - "Vertical distribution of ozone over Srinagar/Gulmarg (34°N) on individual days - 1955-59"

II. "MEASUREMENTS OF THE VERTICAL DISTRIBUTION OF OZONE BY UMKEHR EFFECT AT HYDERABAD (17°4N) DURING SPRING 1961" (A reprint)

III. "THE QUESTION OF THE APPARENT INCREASE OF OZONE DURING THE NIGHT" (A reprint)

III. "NOTE ON OZONE OBSERVATIONS MADE WITH MOONLIGHT" (A reprint)

IV. HIGHER-ORDER UMKEHRS AND CONTRIBUTION DUE TO THE SCATTERING BY THE STRATOSPHERIC AEROSOL PARTICLES 53-60

1. Introduction 53
2. Results and discussion 54

V. STUDIES ON BIENNIAL VARIATIONS IN ATMOSPHERIC OZONE: (Part I) METHOD OF ANALYSIS, DETERMINATION OF THE PERIOD (1952-62) 61-90

1. Introduction 61
2. Sources of data 63
3. Treatment of the data and notations used 64
4. Determination of the period 73
5. Biennial variation during 1952-62 at different latitudes
5.1 Temperate and low latitudes
5.2 High latitudes

VI. STUDIES ON BIENNIAL VARIATIONS IN ATMOSPHERIC OZONE: (Part II) RESULTS OF HARMONIC ANALYSIS OF THE OZONE TIME-SERIES, 1952-62
1. Introduction
2. Existence of other harmonics
3. Results of the tests for significance

VII. STUDIES ON BIENNIAL VARIATIONS IN ATMOSPHERIC OZONE: (Part III) VARIATION IN THE PHASE OF THE 24-MONTH PERIOD WITH TIME; CORRELATION WITH EVENTS IN THE STRATOSPHERE OVER MIDDLE AND HIGH LATITUDES
1. Introduction
2. Regularity in the phase shifts of the biennial variations, suggestion of a 22-year period
3. Summary of results (Part I, II and III)
4. Discussion
4.1 Biennial variations in ozone, temperatures (50-mb) and winds at middle latitudes
4.2 Departures from 'idealized picture'
4.3 Biennial variations in ozone and stratospheric warnings
Appendix - Summary of a Note "The stratospheric ozone reservoir and its fluctuations" presented by K.R. Ramenathan and P.D. Angreji, at the Vienna Sympo.

May 1966.

VIII. OZONE VARIATIONS VERSUS CHANGES IN THE SOLAR CORPUSCULAR RADIATION

1. Introduction 121
2. The present study 123
3. Results 124
3.1 Time variations 124
3.2 Latitude effect 131
4. Discussion 134

References of Section I 120

SECTION II - STUDIES ON AIRGLOW (O I) 5577 Å

IX. AIRGLOW OBSERVATIONS ON (O I) 5577 Å AT SRINAGAR, 1958-60 (Reprint) 138-147

1. Abstract 139
2. Introduction 139
3. Description and calibration of photometer 139
4. Results 143
4.1 Nocturnal variations 143
4.2 Seasonal variations 144
4.3 Year-to-year variations 145
X. MEAN NOCTURNAL VARIATION OF 5577 Å INTENSITY AT LOW LATITUDES

1. Introduction 148
2. Regularities in the nocturnal variations of $I_{5577}$ at stations along the 75°E meridian 149
3. Longitude-effect on the nocturnal variation of $I_{5577}$ at low latitudes 158
4. Discussion 159

XI. SOME OBSERVATIONAL RESULTS ON TIME-VARIATION AND LATITUDINAL DISTRIBUTION OF 5577 Å INTENSITY SUGGESTING INFLUENCE OF MAGNETIC ACTIVITY

(PART I) SOLAR INFLUENCE ON TIME VARIATIONS OF $I_{5577}$

1. Summary of work done earlier 162
2. Results 166
2.1 11-year cycles in $I_{5577}$, $R_z$, SS-area and magnetic activity 166
2.2 Hysteresis-curve like formation in the plot of $I_{5577}$ versus SS-area and its explanation 170
3. Discussion 173

(PART II) LATITUDE EFFECT ON $I_{5577}$

1. Introduction 175
2. Work done earlier on latitude effect 175
3. Present study
   3.1 Latitude effect in the IGY results 177
   3.2 Latitude effect in the results of the World Survey by Lord Rayleigh 181
   3.3 Latitude effect in the 'SOYA' observations 184
4. Concluding remarks 191

SUMMARY of results reported in Section II 193
