Classification of the office-holding and the non-office-holding activists according to age, job-experience, stay in Baroda, education and proficiency in English language (per cent) 220

Classification of the office-holding and the non-office-holding activists according to age, job-experience, stay in Baroda, education and proficiency in English language (in terms of t-statistic: sample(N), mean(X), standard deviation(SD) and Z value) 221

Classification of the office-holding and the non-office-holding activists according to total family members, per capita monthly income and perceived sufficiency of income (per cent) 223

Classification of the office-holding and the non-office-holding activists according to total family members, per capita monthly income and perceived sufficiency of income (in terms of t-statistic: sample(N), mean(X), standard deviation(SD) and the Z value) 224

Classification of the office-holding and the non-office-holding activists according to the length of their membership in trade union and its executive committee (per cent) 227

Classification of the office-holding and the non-office-holding activists according to the procedure by which they became members of the present executive committee (per cent) 228

Classification of the office-holding and the non-office-holding activists according to their participation in executive meetings (per cent) 229

Classification of the office-holding and the non-office-holding activists according to their degree of overall trade union participation (per cent) 232

Classification of the office-holding and the non-office-holding activists according to their overall trade union participation (in terms of t statistic: sample(N), mean(X), standard deviation(SD) and the Z value) 233

Classification of the office-holding and the non-office-holding activists according to the degree of overall agitational participation (per cent) 235
6.14 Classification of the office-holding and the non-office-holding activists according to their overall agitational participation (in terms of t statistic; sample(N), mean(\(\bar{x}\)), standard deviation(SD) and Z value) 236

6.15 Classification of the office-holding and the non-office-holding activists according to their role performance (per cent) 237

6.16 Classification of the office-holding and the non-office-holding activists according to the degree of their attitudinal modernity (per cent) 241

6.17 Classification of the office-holding and the non-office-holding activists according to traditionalism score (in terms of t statistic; sample(N), mean(\(\bar{x}\)), standard deviation(SD) and Z value) 241

6.18 Classification of the office-holding and the non-office-holding activists according to their overall general activism (per cent) 243

6.19 Classification of the office-holding and the non-office-holding activists according to their overall general activism (in terms of t statistic; sample(N), mean(\(\bar{x}\)), standard deviation(SD) and Z value) 244

6.20 Classification of the office-holding and the non-office-holding activists according to the degree of their company satisfaction (per cent) 247

6.21 Classification of the office-holding and the non-office-holding activists according to the degree of their company satisfaction (in terms of t statistic; sample(N), mean(\(\bar{x}\)), standard deviation(SD) and Z value) 247

6.22 Classification of the office-holding and the non-office-holding activists according to the degree of their overall general satisfaction with life (per cent) 249

6.23 Classification of the office-holding and the non-office-holding activists to the degree of their overall general satisfaction with life (in terms of t statistic; sample(N), mean(\(\bar{x}\)), standard deviation(SD) and the Z value) 249

6.24 Classification of the office-holding and the non-office-holding activists according to the degree of their overall alienation (per cent) 252
Classification of the office-holding and the non-office-holding activists according to the degree of alienation (in terms of \( t \) statistic, sample(N), mean(\( X \)), standard deviation(\( SD \)) and the \( Z \) value)

Classification of the prominent and the non-prominent activists in terms of their present federation and the first federation which they joined (per cent)

Classification of the prominent and the non-prominent activists according to their federation and their allegiance with the political party (per cent)

Classification of the office-holding and the non-office-holding activists according to the objectives of trade union given first rank by them (per cent)

Classification of the office-holding and the non-office-holding activists according to the degree of their overall class consciousness (per cent)

Classification of the office-holding and the non-office-holding activists according to the degree of overall class consciousness (in terms of \( t \) statistic, sample(N), mean(\( X \)), standard deviation(\( SD \)) and the \( Z \) value)

Classification of the office-holding and the non-office-holding activists according to the degree of their class solidarity, class militancy and economic radicalism (per cent)

Classification of the office-holding and the non-office-holding activists according to the degree of their class solidarity, class militancy and economic radicalism (in terms of \( t \) statistic, sample(N), mean(\( X \)), standard(\( SD \)) and the \( Z \) value)

Classification of the leftist and the rightist activists according to the degree of overall class consciousness (per cent)

Classification of the leftist and the rightist activists according to the degree of their overall class consciousness (in terms of \( t \) statistic, sample(N), mean(\( X \)), standard deviation(\( SD \)) and the \( Z \) value)
7.10 Classification of the leftist and the rightist activists according to the degree of their class solidarity, class militancy and economic radicalism (per cent)  

7.11 Classification of the leftist and the rightist activists according to the degree of their class solidarity, class militancy and economic radicalism (in terms of the t statistic: sample(N), mean(\(\bar{x}\)), standard deviation(SD) and the Z value)  

7.12 Classification of the leftist and the rightist activists while controlling their status according to the degree of overall class consciousness (per cent)  

7.13 Classification of the leftist and the rightist activists while controlling their status according to the degree of overall class consciousness (in terms of t statistic: sample(N), mean(\(\bar{x}\)), standard deviation(SD) and the Z value)  

7.14 Classification of the leftist and the rightist activists controlling their status according to the degree of their class solidarity, class militancy and economic radicalism (per cent)  

7.15 Classification of the leftist and the rightist activists while controlling their status according to the degree of their class solidarity, class militancy and economic radicalism (in terms of t statistic: sample(N), mean(\(\bar{x}\)), standard deviation(SD) and the Z value)  

7.16 Classification of the office-holding and the non-office-holding activists while controlling their ideological affiliation according to the degree of their overall class consciousness (per cent)  

7.17 Classification of the office-holding and the non-office-holding activists while controlling their ideological affiliations according to the degree of their overall class consciousness (in terms of t statistic: sample(N), mean(\(\bar{x}\)), standard deviation(SD) and the Z value)  

7.18 Classification of the office-holding and the non-office-holding activists while controlling their ideological affiliations according to the degree of their class solidarity, class militancy and economic radicalism (per cent)
7.19 Classification of the office-holding and the non-office-holding activists while controlling their ideological affiliations according to the degree of their class solidarity, class militancy and economic radicalism (in terms of t statistic: sample(N), mean(X), standard deviation(SD) and the Z value)

7.20 Classification of the leftist and the rightist activists according to the background variables. Only those responses which indicated high degree on each of the variables are tabulated (per cent, X² and Z value)

7.21 Classification of the leftist and the rightist activists according to the degree of their overall participation in TU and overall agitational participation. Only those responses indicating high degree are tabulated (per cent, X² and Z value)

7.22 Classification of the leftist and the rightist activists according to their attitudinal and behavioural dispositions. Only those responses showing high degree are tabulated (per cent, X² and Z value)

7.23 Summary of the linear step-wise multiple regression analysis: keeping ideological affiliation as a dummy variable

7.24 Summary of the linear step-wise multiple regression analysis: keeping status of the respondent as a dummy variable

7.25 Summary of linear step-wise multiple regression showing cumulative contribution of each item on total variance in overall class consciousness
