CONTENTS

Chapter 1  Drug Analysis
1.1 Introduction
1.2 Pharmaceutical analysis
1.3 Types of Analytical Techniques
1.4 HPLC Instrumentation
1.5 HPLC Method Development and Validation
1.6 References

Chapter 2: Anastrozole
2.1 Introduction
2.2 Literature survey
2.3 Experimental
2.4 Method Development
2.5 Method Validation
2.6 Discussion on the Results
2.7 References

Chapter 3: Cabergoline
3.1 Introduction
3.2 Literature survey
3.3 Experimental
3.4 Method Development
3.5 Method Validation
3.6 Discussion on the Results
3.7 References
Chapter 4: Celecoxib

4.1 Introduction
4.2 Literature survey
4.3 Experimental
4.4 Method Development
4.5 Method Validation
4.6 Discussion on the Results
4.7 References

Chapter 5: Nebivolol

5.1 Introduction
5.2 Literature survey
5.3 Experimental
5.4 Method Development
5.5 Method Validation
5.6 Discussion on the Results
5.7 References

Chapter 6: Dextromethorphan and Quindine

6.1 Introduction
   6.1.1 Dextromethorphan
   6.1.2 Quindine
6.2 Review of Literature
6.3 Experimental
6.4 Method development
6.5 Validation of the Proposed Method
6.6 Discussion
Chapter 7: Famotidine and Ibuprofen

7.1 Introduction
7.1.1 Famotidine 
7.1.2 Ibuprofen 

7.2 Review of Literature 

7.3 Experimental 

7.4 Method development 

7.5 Validation of the Proposed Method 

7.6 Discussion 

7.7 References 

Chapter 8: Ezetimibe and Simvastatin 

8.1 Introduction 
8.1.1 Ezetimibe 
8.1.2 Simvastatin 

8.2 Review of Literature 

8.3 Experimental 

8.4 Method development 

8.5 Validation of the Proposed Method 

8.6 Discussion 

8.6 References 

Summary and Conclusion
