CONTENTS

Chapter 1

Introduction and Review of Literature

1.1 Introduction 29

1.2 Review of theories of liquids and liquid mixtures 30

1.3 Review of theories of water structure 34

1.3.1 Structure of water 35

1.3.2 Hydrogen bonding 36

1.3.3 Hydration of ions 37

1.4 Review of literature on previous work 38

1.4.1 Literature survey on non aqueous – non electrolytes and electrolyte liquid mixtures/solutions 39

1.4.2 Literature survey on aqueous – electrolytes and non electrolyte liquid solutions/mixtures 57

1.5 Scope of the present work 66

References 71

Chapter 2

Experimental Methods

Review of various experimental techniques

2.1 Ultrasonic velocity measurement 82

2.1.1 Continuous wave methods 82

2.1.2 Pulse techniques 85

2.2 Density measurements 89
2.3 Viscosity Measurement

**Experimental techniques employed in the present investigation**

2.4 Ultrasonic velocity measurement – Interferometer technique

- 2.4.1 Principle
- 2.4.2 Description of the equipment
- 2.4.3 Experimental procedure
- 2.4.4 Effect of diffraction on the velocity measurement

2.5 Measurement of density – Pyknometer technique

- 2.5.1 Basic principle
- 2.5.2 Description of pyknometer
- 2.5.3 Calibration of the pyknometer
- 2.5.4 Experimental procedure

2.6 Measurement of viscosity – Ostwald viscometer method

- 2.6.1 Basic principle
- 2.6.2 Description of viscometer
- 2.6.3 Experimental procedure

2.7 Purification of chemicals

References

**Chapter 3**

**Theoretical Approaches**

- 3.1 Calculated properties
- 3.2 Deviation/excess calculated properties
- 3.3 Partial molar volumes & isentropic compressibiltie’s
Chapter 4

Study of ultrasonic and volumetric properties on non aqueous – non electrolyte liquid mixtures

Introduction

Section A Binary liquid mixtures of N,N-dimethyl formamide with methyl acrylate/ethyl acrylate/butyl acrylate/2-ethyl hexyl acrylate

4.A.1 Importance and properties of the chemicals
4.A.2 Experimental
4.A.3 Results and discussion
Conclusions

Section B Equimolar mixture of (N,N-dimethyl acetamide and ethyl acrylate) with 1-butanol/iso-butanol/t-butanol

4.B.1 Importance and properties of the chemicals
4.B.2 Experimental
4.B.3 Results and discussion
Conclusions

References
Chapter 5

Study of volumetric and viscometric properties on non aqueous – non electrolyte liquid mixtures

Introduction

Section A Binary liquid mixtures of propanoic acid with N,N-dimethyl aniline /N,N-diethyl aniline

5.A.1 Importance and properties of the chemicals

5.A.2 Experimental

5.A.3 Results and discussion

Conclusions

Section B Propanoic acid with equimolar mixture of (N,N-dimethyl formamide and methanol/ethanol/1-propanol)

5.B.1 Importance and properties of the chemicals

5.B.2 Experimental

5.B.3 Results and discussion

Conclusions

References

Chapter 6

Study of Molecular interactions of aqueous - electrolytes and aqueous - non electrolytes

Introduction

Section A Ultrasonic, volumetric and viscometric study of aqueous – electrolyte solutions

6.A.1 Importance and properties of the chemicals
6.A.2 Experimental 267
6.A.3 Results and discussion 268
Conclusions 289

Section B Ultrasonic and thermodynamic study of aqueous – non electrolyte solutions
6.B.1 Importance and properties of the chemicals 290
6.B.2 Experimental 291
6.B.3 Results and discussion 293
Conclusions 316
References 317

Chapter 7
Ultrasonic, thermodynamic and transport properties of non aqueous - non electrolyte liquid mixtures
Introduction 323

Section A Ultrasonic, volumetric and viscometric study of binary liquid mixtures of Dichloromethane/1,2-Dichloroethane with N,N-dimethyl formamide/dimethyl sulfoxide
7.A.1 Importance and properties of the chemicals 326
7.A.2 Experimental 327
7.A.3 Results and discussion 328
Conclusions 366
Section B Volumetric study of binary liquid mixtures of ethylene glycol with formamide/N,N-dimethyl formamide/N,N-dimethyl acetamide

7.B.1 Importance and properties of the chemicals 368
7.B.2 Experimental 368
7.B.3 Results and discussion 369
    Conclusions 384
References 385
### List of Compounds used in the Present Investigation
