The journey of research would be practically impossible without the help of right guidance. True guidance is like a small lamp in a dark forest. It doesn’t show everything at once, but gives enough light for the next step to be safe. I am very happy to have such an easily approachable and appreciable person Dr. Vasanthi Nachiappan as my Ph.D. guide. I sincerely thank her for excellent guidance, support and encouragement during my stay in the “Biomembrane Lab”. Without her continued guidance, advice, encouragement and this dissertation would not have been completed. I am fortuitous to be her student and eternally grateful to her for the help. Thanking you mam!

I sincerely thank Prof. Ram Rajasekharan, Indian Institute of Science, Bangalore for granting permission to carry out part of my research in the Lipid Isle whenever I required and for enthusiastically introducing me into the world of lipid research. Right from the very beginning he encouraged me and his generous support and trust in my capability have pushed me forward, to grow as a young independent researcher. As a bonus, his great conversation skills helped me to tackle critical situations both in professional as well as personal aspects. Thanking you sir!

Special notes of thanks are due to my school teacher Ms. Sarala, who prompted me to pursue a career in science by impressing me with her science classes. The one more notable person is my UG chemistry Prof. Vivekanandan, who has been a source of inspiration to do research and we loved to attend his practical classes. Thanking you sir!

I heartily thank Dr. Rajakumari for training me to do quality research during the initial course of my research work. I really impressed with her experiments and if anyone feels happy with my skills, the credit goes to her. I am grateful to a very wondering and genuine person Mr.V.Parthibane for his uncompensated support. Because of him only I successfully completed my thesis at “lipid Isle”. I gratefully acknowledge all members of present and past “lipid Isle” Indian institute of Science, Bangalore.

Our peaceful home, its Biomembrane lab. A very special thanks to Mr. J. Sabarirajan, because of him only I planned this study for my thesis. The one person to whom I am grateful to is Mr. K. Muthukumar, we shared most of our pleasure and grief from the under graduation and feel relaxed when I share most of problems with him. He supported me during most of the critical situations. I am grateful to all my
colleagues K. Jyothi, K. Selvaraju, C. Sivaprakasam, S. Rajakumar, A. Willam James and Abishek for their help. Manju akka and Rajangam are acknowledged for their laboratory assistance.

I extend my hearty gratitude to L. Vishnu Varthini, C. Sivaprakasam, G.Manobakkiam and K.Maragatham whose presence supported me a lot and gave me such a memorable time during the lab work and also they helped me during thesis writing as well as manuscripts preparation.

I would also like to express my gratitude to, Ms. Marry Sarkar, Ms. Rosa and Dr. Omana joy for their support and help during the course of my research work at IISc, Bangalore.

I have been associated with a wonderful group of seniors and batch-mates, who supported me in all phases of my stay here. A special thanks to Dr. Rajkumar, Dr. S. Dharaneedhaaran, Dr. E. Ramesh, Dr. V.S. Periyasamy, Dr. T. Ashokan, Dr. M. Sakthivel, A. Ganesh, S. Ravichandran, Dr. Faisal, Dr. S. Anandavel, Dr. Gandhimathi, A. Isaipratha, V. Bala, R. Ganesh, Dr. M. Jacob, Pradeep Kumar, Dr. P. Arunmozhivarman, S. Mayavan, R. Arun, Vinoth Kanna, and finally Ravuthar @ Riyaz.

Needless to say to my friend Mr. P. Gandhi, he is truly supporting, encouraging and also criticising my mistakes without expecting anything. Still I remember his words during my B.Sc. class room.

We can do anything if we have a spirit and true support, It is true in my case also and needless to say that, I am truly grateful forever to Soni for supporting me.

Lastly, and most importantly, my special and heartiest thanks are to my lovable brother and sister, I learned everything from them only, they supported me from the childhood onwards. I wish to thank my Amma Appa, who raised me, supported me, taught me and loved me.

Finally I wish to thank my experimental rats, devoted their life for my research and also I dedicate my thesis to them.

......Vijay
