ACKNOWLEDGEMENT

I express my full fathom of indebtedness to Dr. (Miss) N.J. Chinoy, Lecturer, Department of Zoology, University School of Sciences, Gujarat University, Ahmedabad, for introducing me to this field of research, suggesting this line of work, invaluable guidance, critical appraisal of the manuscript and constant encouragement throughout the period of this investigation. I also do not feel constrained to laud her devotion and thank her for kindly offering some valuable guidelines regarding the future line of work.

I am extremely thankful to Dr. V.C. Shah, Professor and Head, Department of Zoology, for providing the necessary facilities to undertake this piece of work. My profound gratitude is to Dr. M.S. Dubale, Reader, Department of Zoology, whose inspiration and encouragement have been enlightening.
I thank the galaxy of my research colleagues and staff members for all the help rendered towards the completion of this project. I specially offer my profuse thanks to Miss Mala R. Chinoy and Miss Jashwantidevi D. Sharma, my research comrades, who have been the granaries of help and cooperation at every stage of completion of this project.

The generous gifts of Cyproterone acetate from Schering A.G., Berlin as well as Prostaglandin F2a and E1 from Dr. John E. Pike, Upjohn Company, Kalamazoo, Michigan, U.S.A, are gratefully acknowledged. The gift of copper wire from Dr (Miss) K.M. Sheth, All India Institute of Medical Sciences, New Delhi, is also thankfully acknowledged.

I am grateful to Dr. P. Neelkantan, Mr. R.S. Chouhan, and Mr. N.C. Patel, Ahmedabad Textile Industries Research Association, Ahmedabad, whose good will and wholehearted cooperation made the Scanning Electron Microscopy possible. Mr. M.M. Sarin, Physical Research Laboratory deserves special thanks for offering the necessary help during the time of Atomic Absorption Spectrophotometry.
The award of a Junior Research Fellowship from the University Grants Commission, during the tenure of which this work was completed, is gratefully acknowledged.

Lastly, my exuberant thanks are due to my friend Mr. C. N. Nair for readily rendering me the technical assistance in the photographic work and the preparation of the thesis.
