ACKNOWLEDGEMENTS

I am deeply indebted to Dr. (Miss) N.J. Chinoy, Lecturer, Department of Zoology, University School of Sciences, Gujarat University, Ahmedabad, for suggesting this line of work and for her constant, unfailing guidance and encouragement throughout the period of this investigation. I am thankful to Dr.V.C. Shah, Professor and Head, Department of Zoology for providing the necessary facilities. I should like to take this opportunity to especially thank Dr.M.S.Dubale for going through the manuscript and offering useful suggestions. I am grateful to Dr.M.N.Jindal, Head, Pharmacology Department, Civil Hospital, Ahmedabad, for criticism and discussion of the studies on drugs.

I express my gratitude to Prof.P.D.Pathak, Head, Department of Physics, for the use of the X-ray machine. I am also grateful to Dr.O.P.Sethi of L.M.College of Pharmacy, Ahmedabad, for the use of the electronic stimulator and for the suggestions offered which have been helpful in discussing the results of chapter IV.

The generous gift of Cyproterone acetate from Schering A.G.Berlin., analgin from Hoechst Pharmaceuticals Ltd., Bombay., Nicotine and Morphine Sulphate from Dr.O.P.Sethi and Dr.R.G. Swami of L.M.Pharmacy College is highly appreciated. Thanks are also due to the Director, Government Opium and Hemp Drugs Depot, Ahmedabad, for permitting the use of Opium.

The award of a University Grants Commission, Junior Research Fellowship is gratefully acknowledged during the tenure of which this work was completed.

Thanks are also due to the members of staff and research colleagues of the department whose co-operation has helped me in preparation of this thesis.

I also thank the local suppliers of the animals for their cooperation in supplying the various animals of the required species / strain as per my request.
