LIST OF FIGURES

Fig. 1. Effect of 'BHC' on growth of microalgae.

Fig. 2. Effect of 'BHC' on growth of mixed culture of fresh water microalgae.

Fig. 3. Effect of 'Nuvacon' on growth.

Fig. 4. Effect of 'Nuvacon' on growth of fresh water mixed culture of microalgae.

Fig. 5. Effect of 'Carbaryl Sevin' on growth.

Fig. 6. Effect of 'Carbaryl sevin' on growth of mixed culture of fresh water microalgae.

Fig. 7. Effect of 'Gramaxone' on growth.

Fig. 8. Effect of 'Gramaxone' on growth of mixed culture of fresh water microalgae.

Fig. 9. Effect of 'Cuman L(R)' on growth.

Fig. 10. Effect of 'Cuman L(R)', on growth of fresh water mixed culture of microalgae.

Fig. 11. Effect of mixture of 5 biocides on growth of microalgae.

Fig. 12. Effect of mixture of 5 biocides on growth of mixed culture of fresh water microalgae.

Fig. 13. Effect of mixture of 3 biocides on growth.

Fig. 14. Effect of mixture of 3 biocides on growth of mixed culture of fresh water microalgae.

Fig. 15. Effect of seven toxicants on gross carbon production of Tetraselmis gracilis.

Fig. 16. Effect of seven toxicants on net carbon production of Tetraselmis gracilis.

Fig. 17. Effect of seven toxicants on gross carbon production of Dicrateria inornata.

Fig. 18. Effect of seven toxicants on net carbon production of Dicrateria inornata.
Fig. 19. Effect of seven toxicants on gross carbon production of mixed culture of freshwater microalgae.

Fig. 20. Effect of seven toxicants on net carbon production of mixed culture of fresh water microalgae.

Fig. 21. Effect of 'BHC' on chlorophyll a content of microalgae.

Fig. 22. Effect of 'Nuvacron' on chlorophyll a content of microalgae.

Fig. 23. Effect of 'Carbaryl sevin' on chlorophyll a content of microalgae.

Fig. 24. Effect of 'Gramaxone' on chlorophyll a content of microalgae.

Fig. 25. Effect of 'Cuman L(R)' on chlorophyll a content of microalgae.

Fig. 26. Effect of mixture of 5 biocides on chlorophyll a content of microalgae.

Fig. 27. Effect of mixture of 3 biocides on chlorophyll a content of microalgae.

Fig. 28. a) Effect of 'BHC' on chlorophyll b content of microalgae.
   b) Effect of 'Nuvacron' on chlorophyll b content of microalgae.

Fig. 29 a) Effect of 'Carbaryl sevin' on chlorophyll b content of microalgae.
   b) Effect of 'Gramaxone' on chlorophyll b content of microalgae.

Fig. 30 Effect of 'Cuman L(R)' on chlorophyll b content of microalgae.

Fig. 31. a) Effect of mixture of 5 biocides on chlorophyll b content of microalgae.
   b) Effect of mixture of 3 biocides on chlorophyll b content of microalgae.

Fig. 32. Effect of three biocides on chlorophyll c content of Dicrateria inornata.

Fig. 33. Effect of four toxicants on chlorophyll c content of Dicrateria inornata.

Fig. 34. Effect of 'BHC' on carotenoid content of microalgae.

Fig. 35. Effect of 'Nuvacron' on carotenoid content of microalgae.

Fig. 36. Effect of 'Carbaryl sevin' on carotenoid content of microalgae.
Effect of 'Gramaxone' on carotenoid content of microalgae.

Effect of 'Cuman L' on carotenoid content of microalgae.

Effect of mixture of 5 biocides on carotenoid content of microalgae.

Effect of mixture of 3 biocides on carotenoid content of microalgae.

Effect of 'BHC' on protein and carbohydrate content of microalgae.

Effect of 'Nuvacron' on protein and carbohydrate content of microalgae.

Effect of 'Carbaryl sevin' on protein and carbohydrate content of microalgae.

Effect of 'Gramaxone' on protein and carbohydrate content of microalgae.

Effect of Cuman L' on protein and carbohydrate content of microalgae.

Effect of mixture of 5 biocides on protein and carbohydrate content of microalgae.

Effect of mixture of 3 biocides on protein and carbohydrate content of microalgae.
