Acknowledgement

I would like to thank everyone who contributed to this work including the first thought and the courage placed in me to take this great task leads me to the end. I am happy and grateful to have met many positive and negative personalities giving me the challenging and the positive atmosphere to carry out this work.

First of all I am thankful to my mentor for accepting me as a part of our dearest lab; (a family) Receptor and the growth factor laboratory. I always found him so calm and relaxed, as a source of inspiration, a strict teacher, a loving fatherly figure, and a carrying personality showed the direction towards the science to each of the lab member as well as given a view to take life as a challenge and realize it with full confidence, always set a goal in life which adds a strength to me. I am thankful for him always to be a shield for all of us and treating us as his children. He has played a major role in developing my overall personality. Thank you sir!!!

I am thankful to the former Director of GCRI, Dr. Pankaj M. Shah, and current Director Dr. Shilin N. Shukla for their kind permission and for providing fabulous laboratory facilities at the institute to carry out the work. I am also thankful to all granting agencies/ GCS, GCRI, DMER, GSBTM, and DST for providing the grant to accomplish the work.

I am also thankful to Dr. Rakesh Raval to facilitate me carry out the work and for all his direct or indirect support and cooperation.

How would I express my thanks to u papa mumma I don’t know…….I don’t have words to express my feelings; still I would like to express that without u I m nothing. U are my land that always has given the base, without what, a plant can not grow, a land that always there to take my trouble and pain that I would be less harmed in my adverse situation/time simultaneously always careful not to overprotect me. I am thankful to be always with me for being my strength for your endless support, encouragement, for nurturing me with the culture of honesty and providing me good morals. I have been privileged to have u as parents.

I am also thankful to my respected bhai and bhabhi for providing me the help and support as well as the positive thoughts, for providing all the comfort and joy. I am thankful to Vicky (nephew) for making the atmosphere very light with his cute jokes and for his concern.
My sincere thanks belong to my grandfather late shree Tarachandbhai Raval ... for inspiring me to go ahead and ahead... and that gives me a courage, the feeling of responsibility to provide a fame to the whole Tarachand family. The successful completion of this thesis may be a true tribute to him. Thank u grand pa!!!!

Finally, from the bottom of heart I am thankful to my dearest friend, a life time companion and my backbone, my husband Mr. Dhiren Pandit, for his endless love, support and always encouraging me for the new task, protecting me in the adverse social environment, for accepting me as what I am, never try to grab my freedom and allow me to think independently. I am thankful to him for taking my dream as his dream and always be there with me in my ups and downs without any grumble. I am happy to share this journey of life with him and look forward to share many more. I am also thankful to my in-laws for their support and understanding.

I am thankful to Dr. Heena Dave, a combination of the strict and carrying personality for her help, support to make me learn lots of scientific principles as well as performing the smart work and the team work. How beneficial her strictness to me that I understand in her absence. I learn so much from her, from her shared incidence and the struggle what she has faced. I always remember the days we have lived in RGFL.

I am thankful to all my seniors who are not in RGFL and taught me a single or a smallest thing after joining the RGFL. I am also thankful to all the past and the present fellows as well as the dissertation students for helping me anyway.

I am thankful to Ms. Anupamaben, data manager for managing the whole database with number of molecules, for her readiness in helping me at any point of time, for her suggestions and the mental support. I am thankful to Ms. Hiral, Ms. Angana and Ms. Nikita for taking the responsibilities while I am busy with the thesis work as well as helping me during the analysis. Thanking all of you for your kind and sincere reward less support. Good luck for your future.

I am sincerely grateful to all people who contributed in one way or the other in the completion of this work, people I met and interact with in past years which includes all the departments of the GCRI, servants of the RGFL, dissertation students, the most important -my patients, my friends and all my well wishers. I am thankful for your wishes and the blessings.
Last but not the least I am grateful to my Ishwar (GOD) that I have such a great people in my life- my Family, my mentor, my labmates, for making me capable to stand amongst all unfavorable circumstances and giving me the opportunity to learn so much during these years which would be useful in my personal and the professional upliftment.

Ms. Apexa P. Raval
