INDEX

1. GENERAL INTRODUCTION ... 1-53

1.1 Nature of phase transfer catalyst ... 1
1.1.1 History ... 2
1.1.2 Preparative applications ... 3
1.1.3 Advantages of phase transfer catalysis ... 9

1.2 Phase transfer catalysts ... 10
1.2.1 Tetraalkyl-quats as phase transfer catalysts ... 12
1.2.2 Heterocyclic quats as phase transfer catalysts ... 23
1.2.3 Podands as phase transfer catalysts ... 24
1.2.4 Macrocyclic ligands as phase transfer catalysts ... 26
1.2.5 Cyclodextrins as phase transfer catalysts ... 29
1.2.6 Polymer supported PTC, triphase catalysis ... 29

1.3 Basic steps in phase transfer catalysis ... 32
1.3.1 Transfer of anions from aqueous to organic phase ... 32
1.3.2 The intrinsic reaction or organic phase displacement reaction steps ... 39

1.4 Mechanisms of phase transfer catalysis ... 42
1.4.1 (a) Extraction mechanism

(b) Braendstroem- Montanari modifications of Stark's extraction mechanism ... 42

1.4.2 The interfacial mechanism ...... 43
1.4.3 Hydrophilicity and organophilicity of quaternary cation ...... 43

1.5 Solid-liquid phase transfer catalysis .... 45
1.6 Reaction condition
1.6.1 Amount of catalysts
1.6.2 Stability of catalysts
1.6.3 Choice of solvent
1.6.4 Choice of catalysts
1.6.5 Effect of stirring
1.6.6 Separation and recovery of catalysts

2. A STUDY OF N vs O ALKYLATION IN 3-CYANO-4,6-DIARYLPYRIDIN-2(1H)-ONES UNDER PHASE TRANSFER CONDITION

2.1 Introduction
2.2 Present work
2.3 Results and discussion
2.4 Experimental

3. PHASE TRANSFER CATALYSED PREPARATION OF 4,6-DISUBSTITUTED 2-AMINONICOTINONITRILES: A STUDY OF CONVERSION OF 2-CHLORONICOTINONITRILES TO 2-AMINONICOTINONITRILES

3.1 Introduction
3.1.1 Synthetic importance of 2-aminonicotinonitrile
3.1.2 Biological importance of 2-aminonicotinonitrile
3.1.3 Synthesis of 2-aminonicotinonitrile
3.1.4 Synthesis of tetrazolo[1,5-a]pyridines
3.1.5 Reductive ring cleavage of tetrazole/azido moiety
3.2 Present work
3.3 Results and discussion
3.3.1 Synthesis of tetrazolo[1,5-a]pyridines . . . 112
3.3.2 Reductive ring cleavage of tetrazolo[1,5-a]pyridines. Formation of 4,6-disubstituted 2-amino-3-cyanopyridines . . . 125
3.4 Experimental . . . 131
4. THORPE-ZIEGLER TYPE OF CYCLIZATIONS USING PHASE TRANSFER CATALYSIS : SYNTHESIS OF THIENO-[2,3-b]PYRIDINES AND FURO[2,3-b]PYRIDINES . . . 144-183
4.1 Introduction . . 144
4.2 Present work . . . 151
4.3 Results and discussion . . . 152
4.3.1 Synthesis of 4,6-disubstituted 3-amino-2-carbethoxyfuro-[2,3-b]pyridines via Thorpe-Ziegler type of cyclization under phase transfer condition . . 152
4.3.2 Synthesis of 4,6-disubstituted 3-amino-2-carbethoxythieno-[2,3-b]pyridines . . 165
4.4 Experimental . . . 171
5. LIQUID-LIQUID PHASE TRANSFER CATALYSED HETERO-AROMATIC NUCLEOPHILIC SUBSTITUTION REACTION IN 4,6- DISUBSTITUTED 2-CHLORO-3-CYANOPYRIDINES. . . 184-222
5.1 Introduction . . 184
5.2 Present work . . . 190
5.3 Results and discussion . . . 190
5.3.1 Synthesis of 4,6-disubstituted 2-(O,O-isopropylidene-2,3-dihydroxypropoxy)-3-cyanopyridines (XIII, 124-134) . . 190
5.3.2 Synthesis of 4,6-disubstituted 2-(2,3-dihydroxypropoxy)-3-cyanopyridines (XIV, 135-145) . . 193
5.4 Experimental . . 207
