LIST OF TABLES

Chapter

I. INTRODUCTION:
   Objectives of the study
   Sources and coverage of data
   Plan of the study

II. ELECTRONICS INDUSTRY:
   International scenario
   Indian scenario
      Seventh plan review
      Government policies
      Performance of electronics industry
      Industry profile
      Technology development in electronics
   Conclusions
   References

III. TELECOMMUNICATION AND COMPUTER SECTOR: GROWTH AND PERFORMANCE
   Telecommunication sector
      History of telecommunication
      Introduction of telecommunication equipments
      Growth of telecommunication sector
      Government policies and its implications for telecommunication sector
      Indian telecom network
Perspective Plan 1990 - 2000

Conclusions

Computer sector

History of computers

Introduction of computer equipments

Growth and prospects of computer sector in India

Government policies for computer sector

Estimated demand of computers in India

Conclusions

Financial structure and profitability analysis

Definition of variables

Financial structure of the industries

Telecommunication sector

Computer sector

Profitability pattern and structural relationship

Telecommunication sector

Computer sector

Operating efficiency

Telecommunication sector

Computer sector

Conclusions

References

IV. MANUFACTURING PROCESS IN TELECOMMUNICATION AND COMPUTER SECTORS

Manufacturing processes

Raw materials and components

Conclusions

References
V. COSTING AND PRICING IN TELECOMMUNICATION AND COMPUTER SECTORS:

Cost Behaviour

Definition of variables
Telecommunication sector
Computer sector
Conclusions

Cost Accounting System

Cost in general
Cost centres
System
Costing system explained
Compilation of cost statistics by Integral accounting
Classification, allocation and apportionment of expenses
Cost ascertainment
Standard costing
Conclusions

Costs calculations

General view
Calculation of costs of company, and product(s)
Conclusions

Pricing

Market structure
Pricing
Conclusions

References
VI. COST CONTROL SYSTEMS IN TELECOMMUNICATION
AND COMPUTER SECTORS:

Introduction
Cost control systems and procedures
Corporate objectives
Organisation charts and manuals
Setting of cost centres
Inter departmental documentations
Internal control systems
Budgetary control system
Cost information system and Management information system
Penalties and Rewards
Conclusions
References

VII. CONCLUSIONS:

Main findings and their implications
Growth
Financial structure
Profitability
Manufacturing processes
Costing and pricing
Cost control systems
Areas for further research

APPENDICES
