ACKNOWLEDGEMENT

The author sincerely expresses deep sense of gratitude and indebtedness to Dr. S.G. Desai, Research Guide, Head of the Department of Microbiology, University School of Sciences, Gujarat University, for his inspiring guidance and encouragement during the course of investigations and for his keen interest and help in preparation of this manuscript. The author considers himself most fortunate to have availed of the opportunity to work with a scientist of his calibre and was greatly benefitted by his authoritative insight into the microbiological problems.

The author wishes to express his grateful thanks to Dr. N.K. Yadav and Dr. S.R. Dave, the staff members of the Department of Microbiology for their kind co-operation.

The author's gratitude is expressed to Gujarat University and University Grants Commission for providing the opportunity, facilities and funds to produce this manuscript.
A special word of thanks go to Dr. A.V. Gajjar, Department of Statistics, University School of Sciences, Gujarat University, who so skilfully interpreted the author's intentions in the analysis of data applying statistical methods.

The author wishes to thank his research colleagues, Mr. P.V. Desai, Mr. K.D. Patel, Mr. S.N. Shah and the students of the Department of Microbiology for their whole hearted co-operation, useful suggestions and constructive criticism from time to time.

The author is personally thankful to Mr. B.G. Talsania for the neat typing work.

Finally, the author sincerely thanks his family members for their great forbearance over the past years in which he has been occupied with the research work. In particular the author thanks his parents and his brother Shri Ravibhai for their considerable encouragement and help in the past years.

Department of Microbiology, University School of Sciences, Gujarat University, Ahmedabad 380 009, INDIA
