Acknowledgement

Research is a continuous process ever since the earth has taken birth and a man emerged on it. It can never be an outcome of an individual’s talent or efforts. Today, at the acme of my presentation, I gratefully remember my parents, teachers, colleagues, friends and well wishers. As one flower cannot make garland, this effort would not have taken shape without whole-hearted encouragement, support and live involvement of all above.

It is with great pleasure and profound sense of reverence towards my esteemed guide and perceptor, Dr. M. C. Gohel, Ph.D., Principal and professor, for his erudite guidance, timely suggestions and critical remarks throughout the span of my work. This work would have been impossible without his constant support, untiring inspiration, total understanding, exemplary punctuality and perfection. All the time he made available to me for discussion and clarification. It is with affection that I acknowledge my indebtedness to him and his astounding dedication, often far beyond the call of duty.

I owe debt of gratitude to him as a Principal for providing me the laboratory, library and computer facilities at the college for conducting this work.
I take this opportunity to express my thanks to Dr. B.N. Suhagia, Dr. R.K. Goyal, Dr. K.N. Patel, Dr. G.K. Jani, Dr. L. D. Patel, Ms. Bakulaben, Mr. I.S. Rathod, Dr. Mamata and many others who have motivated and encouraged me to fulfill this endeavor.

How can I forget the timely support from Dr. Pranav and Nilay! I am grateful to Urmishbhai and Siddhi copiers in completing the computer work with all priority.

I acknowledge with thanks Dr. Rajubhai, lab.-Assistant, who provided all the materials and facilities.

I am also thankful to the library and machine-room staff for their untiring help.

I also acknowledge Ms. Dipal for providing her expertise in the challenging task of filing patents in this work. I am very much obliged by Mr. K. R. Raju, my senior colleague from M/s. Jenburkt Pharmaceuticals Ltd. For providing me costly APIs and excipients. I acknowledge timely help and support extended by Zydus cadila Healthcare Ltd., Restech Pharmaceutical Ltd., and Helios Pharmaceutical Ltd., for present work.

I cannot forget the role of Dr. Ami, for her constant inspiration during completion of this work.
I would be failing in my duties if I do not thank my sons Harsh and Parth; my family members and all my affectionate students Archana, Jinesh, Himal, Manish, Vimal, Moin and Niazi; they all have contributed in encouraging way with their constant source of inspiration in completion of this work. This work would have been impossible without untiring boost from my wife Hema.

Last but not the least I pay reverence to the SUPREME power GOD who blessed me for completing my work.

December 2003

R.K. Parikh
