ACKNOWLEDGEMENTS

I take this opportunity to express a deep sense of gratitude and indebtedness to my respected teacher and guide Dr. M. N. Jindal, Senior Professor of Pharmacology, B.J. Medical College, Ahmedabad, for suggesting this problem and for his invaluable guidance, greatly useful criticism and suggestions, keen interest and his constant encouragement throughout the course of this work.

I also thank Dr. R. B. Doctor, Professor of Pharmacology for interest and encouragement during the work. I have been greatly obliged by Dr. V. V. Kelkar, Lecturer of Pharmacology, for his interest, useful discussions and for critically examining the manuscript. My thanks are also due to staff members of the department for their kind co-operation. Assistance of Shri R. J. Chudasama is gratefully acknowledged.

I am also thankful to the Dean, B.J. Medical College, Ahmedabad for providing all the facilities to carry out this work.

Last but not in the least I gratefully acknowledge the generous gift of chloroquine by May and Baker (Dagenham); of amodiaquin by Parke-Davis (Detroit); of adrenaline and noradrenaline by Sigma Chemicals (St. Louis);
of isoprenaline by Fluka A.G. (Switzerland); of angiotensin and reserpine by Ciba (Bombay); of tyramine by Dr. Hegde of Roche Products (Bombay); of mecamylamine by Merck Sharp & Dohme (Rahway); of P-286 by Dr. T. Lamar Kerley of Pittman Moore (Indianapolis); of dimethylphenylpiperazinium by Dr. Chen of Parke-Davis (Michigan); of MeK-A-243 and dibozane by Dr. John Kleis of MeNeil Lab. (Pennsylvania); and pronethalol by Dr. Mullin of Imperial Chemical Industries (Cheshire).
