ACKNOWLEDGEMENT

I have been fortunate to undertake this journey of learning and my voyage has been made richer with the contribution, support and assistance of my well-wishers. I would like to acknowledge my sincere indebtedness for their valuable support and express my sincere gratitude.

It has been a matter of great privilege to be a research student under the esteemed guidance of Dr. Mukesh Gohel, professor and principal, L. M. College of Pharmacy, Ahmedabad for his erudite guidance and untiring encouragement. He has synergized my efforts to bring this dissertation in the present form. I take this opportunity to express my heartfelt gratitude for his invaluable guidance, inspiration and support. His brilliant creativity and enthusiasm have guided my research work from its conception to completion.

I would like to acknowledge my sincere thanks to Dr. R. K. Parikh for moral support, encouragement and inspiration. I am thankful to Dr. Rajubhai Shah for his kind co-operation and beneficent help during my work. I express my sincere thanks to Mr. D. D. Bhalara for his indefatigable efforts, counseling and constant support during my B. Pharm study. I wish to express my amicable tanks to the entire technical and non technical staff of L. M. College of Pharmacy. I am truthfully thankful to Zydus Cadila for extending help in carrying my research work as well as for providing gift samples of drug and polymers. At the time of acknowledgement, how can I forget L. M. College of Pharmacy where I spend more than eight years of my life! I am undeniably proud to be associated with this college.

It was pleasure working with my colleague cum friend Stavan Nagori. We worked together and spend invaluable moments in lab and at tea center. At this moment how can I forget my beloved friends Smita Galani, Sindhumadam and Khyati for their love, care, affection and sympathetic moral support rendered on me. They are more than just a friend. They are always there behind the progress and success in every step of my life.
This account would be incomplete without acknowledging the co-operation of M. Pharm students, Manoj, Dharmendra, Bharat, Aniket, Vivek, Praful, Bhavik, Kalpan, Amar, Radhika, Toral, Sejal, Sanjay, Vipul, Chetan, Manan, Amish, Parimal and Niraj.

Here I draw a special attention to my husband cum dear friend Bhavin for always being with me. His constructive support, endless motivation, ebullient enthusiasm makes me possible to be at this stage. He has a wonderful way of making me feel really good about myself. My lovely son Om is one of the pioneers for me to reach here. Motivation and encouragement keep a person moving towards new endeavors and I am grateful to my sisters Nehal and Aditi for being that motivator. They enlighten my path to success by their constant inspiration, sinewy support and animadversions.

My parents’ blessings are of paramount importance in all aspect of life and Ph. D. is no exception. I am and will always be indebted to my parents for their love, care and motivation. Without their extreme faith in me, it was impossible for me to reach at this stage of my life. Without them I could not even dare to dream about reaching this summit.

Lastly I owe a depth of immeasurable gratitude to omnipresent almighty God for his transcendental blessings without which it seemed impossible for me to reach where I am today.
