ACKNOWLEDGEMENT

I feel great pleasure and take the privilege to express my deep sense of gratitude and indebtedness to my respected teacher and guide, Dr. H. Jana, M.B., B.S., M.Sc., Ph.D. (Cal.), F.A.M.S., Professor and Head of the Department of Physiology and Biochemistry, Smt. N. H. L. Municipal Medical College, Ahmedabad, for suggesting this problem and for his invaluable guidance and suggestions, keen interest and his constant encouragement throughout the course of this work.

I am grateful to Dr. H. S. Shah, Dean, Smt. N. H. L. Municipal Medical College, for providing me all the facilities to carry out the research work in the college.

I owe a special debt of gratitude to Dr. Vilasben Mehta, M.D., and staff members of Gynaecology Department of V. S. G. H., for providing me the facilities and clinical material for this study.

I express my sincere thanks to Dr. I. A. Haideri, M.D., and Dr. R. N. Rao, M.D., Associate Professors of Physiology, Smt. N. H. L. Municipal Medical College, who encouraged me to carry out the present work.

I am also thankful to Dr. S. Shashidhar, Ph.D., Assistant Professor in Biochemistry, M. M. J. Institute of Ophthalmology, Ahmedabad; Dr. B. M. Palan, M.D., Assistant Professor in Physiology, and Dr. J. D. Lakhani, M.D., Assistant Professor in Medicine, Medical College, Baroda, for their suggestions and useful criticism of this work.

Thanks are also due to Mr. A. Soni, Research Technician, Department of Physiology, for his invaluable help.

I would be ungrateful if I do not thank the pregnant and nonpregnant women who are included in this study.
