4.14 Debye-Waller Factors and Mean Square Displacements for Barium at Different Temperatures

4.15 Isothermal Bulk Modulus BT at Different Temperatures for Alkaline Earth Metals

4.16 Linear Coefficient of Thermal Expansion for Alkaline Earth Metals at Zero Pressure

4.17 Comparison between Grüneisen Parameters with Experimental and Other Theoretical Values for Alkaline Earth Metals

4.18 Effect Temperature on Grüneisen Parameters for Alkaline Earth Metals

4.19 Radial ($R_L$) and Tangential ($T_L$) Force Constants at Different Temperatures for Calcium

4.20 Radial ($R_L$) and Tangential ($T_L$) Force Constants at Different Temperatures for Strontium

4.21 Radial ($R_L$) and Tangential ($T_L$) Force Constants at Different Temperatures for Barium

4.22 Interatomic Tensor Force Constants $K_{αβ}$ at Different Temperature for Calcium

4.23 Interatomic Tensor Force Constants $K_{αβ}$ at Different Temperature for Strontium

4.24 Interatomic Tensor Force Constants $K_{αβ}$ at Different Temperature for Barium

4.25 The SOEC and Bulk Modulus for Alkaline Earth Metals at Temperature 0°K

4.26 Dynamical Elastic Constants $C_{11}$, $C_{12}$, $C_{44}$, Shear Modulus $C'$ and Bulk Modulus $B$ for Calcium at 300°K

4.27 Dynamical Elastic Constants $C_{11}$, $C_{12}$, $C_{44}$, Shear Modulus $C'$ and Bulk Modulus $B$ for Strontium at 300°K

4.28 Dynamical Elastic Constants $C_{11}$, $C_{12}$, $C_{44}$, Shear Modulus $C'$ and Bulk Modulus $B$ for Barium at 300°K
4.29 Temperature Derivatives of Second Order Elastic Constants at 300°K

4.30 Deviation from Cauchy's Relation, Cauchy's Ratio, Poisson's Ratio and Young's Modulus in Alkaline Earth Metals

4.31 Propagation Velocities of Elastic Waves in Alkaline Earth Metals

4.32 Debye Temperature $\theta_D$ at 0°K for Alkaline Earth Metals

4.33 Comparison of Maximum Phonon Frequency $\omega_{\text{max}}$, Mean Frequency $<\omega>$ and $(\omega^2)^{1/2}$ with Experiment for Alkaline Earth Metals

4.34 Calculated Values of Second Moment (Fundamental Frequency) $(\omega^2)$ for Alkaline Earth Metals

4.35 Calculated Values $\frac{\Delta\omega_{\text{eff}}}{\omega_{q,A}}$ at Some Symmetry Points for Alkaline Earth Metals

4.36 Electrical Resistivities Calculated from the Ziman Formula $\rho_{\text{ziman}}$ from the Self-Consistent Treatment $\rho_{\text{se}}$ and Mean Free Path for Liquid Alkaline Earth Metals

4.37 The Calculated Values of the Phase Shift and $t$-matrix Resistivities for Liquid Alkaline Earth Metals

4.38 Monovacancy Resistivity of Alkaline Earth Metals

4.39 Thermo-Electric Power for Liquid Alkaline Earth Metals

4.40 Distortion of Fermi Surface at Some Symmetry Points for Calcium and Strontium

4.41 Distortion of Fermi Surface at Some Symmetry Points for Barium

5.1 Input Data for Thorium

5.2 Pseudopotential Parameters for Thorium

5.3 Binding Energy and Bulk Modulus $B$ for Thorium Static Elastic Constants $B_{11}, B_{12}, B_{44}$ and $B'$ for Thorium
5.4 Debye Waller Factors and Mean Square Displacement for Thorium at Different Temperatures

5.5 Volume Thermal Expansion and Isothermal Bulk Modulus for Thorium

5.6 The Grüneisen Parameter for Thorium

5.7 Radial ($R_L$) and Tangential ($T_L$) Force Constants at Different Temperatures for Thorium

5.8 Interatomic Tensor Force Constants $K_{\alpha\beta}$ at Different Temperatures for Thorium

5.9 Dynamical Elastic Constants $C_{11}$, $C_{12}$, $C_{44}$, $C'$ and Bulk Modulus $B$ for Thorium

5.10 Deviation from Cauchy's Relation, Cauchy's Ratio, Poisson's Ratio and Young's Modulus for Thorium

5.11 Propagation Velocities of Elastic Waves in Thorium
