ACKNOWLEDGEMENTS

I wish to express my sincere gratitude to Professor K.R. Ramanathan and Professor V.A. Sarabhai for giving me an opportunity to work in the Physical Research Laboratory.

I am indebted to Professor S.P. Pandya for introducing me to the subject and valuable guidance throughout the work. I am also very grateful to him for his critical examination of the manuscript and help in its preparation. I am indebted to Professor A.N. Mitra and Dr. K.H. Bhatt who helped me to understand different phases of this work at an early stage. The encouragement given to me by Professor Ramanathan during my work is gratefully acknowledged.

I am thankful to the entire staff of the IBM group for helping and running my computer programmes. Thanks are due to Miss Y.D. Patel for typing the manuscript very carefully.

Finally I extend my thanks to the Ministry of Education, Government of India, for partial financial support during the period of the work.

M. S. SHAH
