ACKNOWLEDGEMENT

I am deeply indebted to Prof. B.L.K. Somayajulu for his valuable guidance and encouragement throughout this investigation. His deep physical insight, sparking ideas added significantly towards this thesis and illuminating comments helped to improve upon the manuscript. My sincere thanks are due to Prof. S. Krishnaswami whose ideas, suggestions and valuable time greatly helped me in having a synoptic view of the problem in a better perspective. I also thank Prof. D. Lal for his keen interest and encouragement.

I thank Dr. M.M. Sarin for getting me acquainted with AAS and other analytical techniques. My sincere thanks are due to Dr. Rajagopalan of Birbal Sahni Institute of Palaeobotany, Lucknow, for $^{14}C$ measurements, Drs. S.K. Bhattacharya and R.V. Krishnamurthy for stable isotope measurements and Shri M.V.S. Guptha of National Institute of Oceanography, Goa. for paleontological measurements.

My special thanks are due to Drs. S.N. Rajaguru and A.R. Marathe of Deccan College-Pune, R.K. Sood of Space Applications Centre-Ahmedabad, S.V. Deshpand of Oil and Natural Gas Commission-Dehradun for all their helps during the field trips.
It is my pleasure to thank Dr. S.N. Rajagurua, Profs. S.S. Merh of Geology Department-M.S. University, Baroda, A.S. Naidu of University of Alaska, U.S.A., Egon T. Degens of Hamburg University, F.R.G., and Rhodes W. Fairbridge of Columbia University, U.S.A. for their constructive suggestions during my discussions with them.

For encouragement through discussions and seminars, I thank the senior colleagues of our group Profs. K. Gopalan, N. Bhandari and M.N. Rao.

For encouragement and interest in my work, I would like to thank Mr. R.R. Nair and Dr. H.N. Siddique of National Institute of Oceanography, Dr. Baldev Sahai of Space Applications Centre and Dr. S.K. Biswas of Oil and Natural Gas Commission.

I gratefully acknowledge the helps provided at some stage or other by Drs. G. Subramaniam, Pankaj Sharma, N. Hussain, Mr. R. Rongarajan and Drs. M.B. Potdar, R. Ramesh, C.M. Nautiyal, R. Jha, J.N. Goswami, P.N. Shukla, V.N. Nigam-purkar and T.R. Venkatesan as well as M/s. J.T. Padia, Kanchar Pande, D. Sengupta, A. Sarkar, R.A. Jani and J.R. Trivedi.

I am particularly grateful to Drs. R.K. Pant and Kailash Dilli for discussions and for checking the manuscripts.
I owe a special appreciation to Mr. V.G. Shah for maintaining the X-ray diffractometer. My thanks are due to M/s. M.P.K. Kurup and K.K. Sivasankaran for their help with glass blowing jobs and A.R.S. Pandian, N.R. Manohanda and G.D. Panchal for their help in maintaining the electronics units. Dedicated help by Mr. J.P. Bhavsar is greatly appreciated.

I thank Mr. S.C. Bhavsar, Mr. D.R. Ranpura, Mrs. Kokilaben Bhatt and the entire library staff for help with drafting, photography and xeroxing and other helps respectively.

I specially thank Mr. V.T. Viswanathan for a fast, efficient and neat typing of this thesis.

The Mass Spectrometers used for stable isotope measurements reported in this study are funded by the Department of Science and Technology, Government of India.

I thank my parents for their constant encouragement. I am extremely grateful to my wife Inthu who has been the source of inspiration in the perspiring period, and for all her involvement in my work in innumerable ways.
