Acknowledgements

More than five years of cruise in the realm of unknown is coming to an end. Time to acknowledge and appreciate the help of all those who made this voyage possible, pleasant and fruitful.

I would like to thank my thesis supervisor Dr. V.B. Gohil, Prof and Head, Dept. of Physics, School of Sciences, Gujarat University, Ahmedabad, for guiding me at every step of this study.

Dr S.A. Haider, Reader, Physical Research Laboratory (PRL), Ahmedabad, introduced me to the Planetary Sciences and virtually led me into it. This doctoral work is a result of the interest he ignited in me for this stream of knowledge.

A special word of gratitude to Prof. G.S. Agarwal, Director, PRL, for encouraging and providing me the opportunity to work at his institute of international repute. Without his encouragement I would have never been able to take up a study of this nature.

Prof V.B. Sheorey, Dean, and Dr. P Sharma, Head, Academic Services, Prof. H.S.S. Sinha, Area Chairman, Space and Atmospheric Sciences Division, PRL, provided me with the vital logistics support without which this study would have taken much more time for completion. Thank you very much for your support.

Several scholars contributed to enriching this thesis through interactions at different stages of this work. I deeply appreciate the valuable time and insight Prof. Harish Chandra, Prof. A.C. Das, Prof. Shyam Lal, Prof. S.P. Gupta, Prof. A. Jayaraman, Dr. Y.B. Acharya, Dr. R. Sekar, Dr. Hari Om Vats, Dr. Varun Sheel and Dr. S. Ramachandran provided me with.

I am also grateful to the staff members of the Library and Computer Centre of PRL for their promptness and friendly attitude.
I owe a lot to Dr K.N. Desai, Principal, Bhavan's R.A. College of Science, and Prof D.T. Kunchwar, Head of Physics Department, Bhavan's R.A. College of Science. They allowed me the flexibility in work schedule that enabled me to concentrate better on my research work. On several occasions, my colleagues in the department shared my teaching responsibilities so that I could take time off for the laboratory. Their help and constant words of encouragement will remain etched in my heart.

Som Sharma, M.G. Yadava, Alam, Dipu, Lokesh, Harish Gadhavi and many others made my time during this study on the PRL campus worth its while. They were always by my side to discuss any issue arising out of generated data. Thank you buddies. It is difficult to name all, I thank all of them helped me directly or indirectly during the course of this work.

My parents have been an eternal source of inspiration for me. How do I describe their words of encouragement, their blessings........

The thesis could not have taken shape without the concessions my wife Neelu and kids Gaurav and Dhriti gave me. The long hours spent in the laboratory generating, culling and analysing data actually belonged to them. Neelu always enthused me every time the morale sagged. Be it the crest of elation or the trough of despair, she was with me. Gaurav and Dhriti only added to the joys of learning about life when away from the laboratory.

(Shrad P. Seth)
