ACKNOWLEDGEMENTS

I am extremely grateful to my supervising guide Dr. K.S. Beena, Reader in Civil Engineering, School of Engineering, Cochin University of Science and Technology for her inspiring guidance, invaluable help, and encouragement during all phases of this research work. Her comments, criticisms and suggestions during the preparation of this thesis are gratefully acknowledged. Her patience, availability for help when needed, and hospitality are also acknowledged.

I am gratefully indebted to my colleagues Dr. E.K. Kunhanandan Nambiar, Dr. A. K. Raji and Mrs Lathi Karthi, who were always willing to help and exchange valuable informations of mutual interest.

I thankfully acknowledge the help rendered by the Principal, members of the Civil Engineering division, and administrative staff of the School of Engineering, CUSAT. I am grateful to Dr. Benny Mathews Abraham, Professor and Head of the Civil Engineering Division for the facilities extended.

I express my sincere gratitude to the authorities of N. S. S. College of Engineering, Palakkad for permitting me to do the doctoral work on part time basis. The help given by the Principal and Faculty members of the Civil Engineering Department is gratefully acknowledged.

The help and assistance rendered by the laboratory staff of N. S. S. College of Engineering and CUSAT is gratefully acknowledged.

I express my sincere thanks to Prof K. P. S. Nair and Prof M. Radhakrishna Panicker of Mechanical Engineering Division, CUSAT for their help.
I thank Mr. M. D. Nair, M/s AIMIL Ltd. for the help rendered during the setting up of the testing facilities. I also thank Mrs. Jayasree, Research scholar, Mr. Viswanathan, Postgraduate student, Miss Preethy, project staff and Mr. Rajesh for their help.

I could complete enormous experimental work using the laboratory infrastructure developed at N.S.S College of Engineering, Palakkad with the financial assistance received by me through a sponsored project from All India Council for Technical Education, Ministry of Human Resource Development, Government of India. I thankfully acknowledge the same.

The facilities enjoyed from the collaborative project on Coir Bhoovastra by Coir Board, Kochi, at School of Engineering, CUSAT is gratefully acknowledged.

Eternal gratitude is expressed to my family members. Very special and sincere thanks to my daughter, Amrutha, for her love, patience and support.

Last, but no means least, I am extremely indebted to my wife, Sindhu Babu, who with limitless patience offered me her help and support throughout this work, sacrificing her ideals for the sake of mine and bearing my occasional bad temper moods for faults that were not hers. I sincerely hope that I will prove worthy of her dedication.

K.K. BABU
