ACKNOWLEDGEMENT

My grateful acknowledgement is to Dr. M. S. Dubale, Head of the Department of Zoology, University School of Sciences, Gujarat University, Ahmedabad for suggesting the problem and for his guidance throughout the period of investigation. But for his encouragement it would not have been possible to complete this piece of work.

I also wish to record deep appreciation for Shri R. K. Malhotra who has been helpful throughout the different stages of research as well as in the preparation of the manuscript of this thesis.

(Miss) E. G. CHRISTIAN
