Acknowledgements

Though only my name appears on the cover of this dissertation, a great many people have contributed to its production. I owe my gratitude to all those people who have made this dissertation possible and because of whom my doctoral experience has been one that I will cherish forever.

My sincerest gratitude is to my supervisor, Dr. R. R. Hoque for offering me the opportunity to carry out this research and complete the doctoral thesis. I have been amazingly fortunate to have an advisor who gave me the freedom to explore and investigate on my own and at the same time the guidance to recover when my steps faltered. Dr. Hoque taught me how to question thoughts and express ideas. His patience and support helped me overcome many crisis situations and finish this dissertation. I got the chance to know and explore different fields and lab works under his expertise. Under his guidance I have published papers and also presented my research works in national and international seminars/conferences. I am thankful to him for always believing me and encouraging me in all aspects. I am also thankful to him for reading my reports, commenting on my views and helping me understand and enrich my ideas.

Besides my advisor, I would like to thank the rest of the members of my doctoral committee Prof. K. P. Sarma and Dr. A. J. Thakur, for their encouragement, insightful comments, and critical questions. I would also like to thank all the faculty members of Department of Environmental Science, Tezpur University Prof. K. K. Baruah, Dr. A. K. Das, Dr. A.L. Devi, Dr. Nirmali Gogoi, Dr. S.S. Bhattacharya, Dr. M. Kumar, Dr. A. Prakash, Dr. S. Mitra and Sumi Handique for their valuable advice and suggestions during the Ph.D. tenure. Especially Dr. A. Prakash helped me in interpretations of meteorological data.

I am forever indebted to those people who had lent their helping hands in field work. I express my gratitude to those family members who had allowed me to conduct the biomass burning sampling in their kitchens. I would like to communicate my gratitude to my fellow lab-mates Rebecca, Pranamika, Karishma, Nivedita and Warisha for the stimulating discussions, critical inputs, and for all the fun we have had in the last five years. Furthermore, I would also like to thank all the research scholars of Department
of Environmental Science, Tezpur University for their kindness and friendship. In particular, I am grateful to Mr. Jayanta Bora, Mr. Ratan Boruah and Mr. Arup Chakrabarty who had helped me in analysis of my samples.

I am also thankful to the system staff who maintained all the machines in my lab so efficiently that I never had to worry about viruses, losing files, creating backups or installing software. I am also grateful to the following former or current staff at Tezpur University, for their various forms of support during my doctoral study.

I must also express my sincere gratitude to the administration, particularly the librarian and library staff of Tezpur University, Assam, North Eastern Hill University, Shillong and Jawaharlal Nehru University, New Delhi, for their kind consideration and assistance in providing the necessary requirements in terms of reading and reference materials.

I would like to acknowledge the project entitled “Physicochemical characterization of aerosol and source apportionment in mid-Brahmaputra plain in Assam: a modeling approach” sponsored by Ministry of Earth Sciences (MoES), Govt. of India (No. MoES/16/16/10-RDEAS for equipments and other analytical supports rendered while conducting the vital experiments.

Many friends have helped me stay sane through these trying years. Their support and care helped me overcome setbacks and stay focused on my doctoral study. Worth mentioning amongst them are Pinku, Runjun, Pallavi, Anisha and Biju. I greatly value their friendship and I deeply appreciate their belief in me.

I must express my special thanks to Ankita, John, Rajesh, and Gitamoni for helping in the thesis with helpful inputs in lay-out, proof reading and necessary brain-storming.

Most importantly, none of this would have been possible without the love and patience of my family. My immediate family, to whom this dissertation is dedicated to, has been a constant source of love, concern, support and strength all these years. I would like to express my heart-felt gratitude to my family. My extended family has aided and encouraged me throughout this endeavor. I warmly appreciate the generosity and understanding of my extended family.
Finally, I appreciate the financial support from UGC under the Rajiv Gandhi National Fellowship (RGNF) (No.F.14-2(SC)/2009 (SA-III) for SC students.

Pratibha Deka
