List of tables

Table 1: Occurrence and distribution of *Drosophila* species in 11 districts of Nagaland 15

Table 2: List of species of *Drosophila* and their numbers collected at different altitudes of mount Japfu during 2010-2011 37

Table 3: Absolute (A) and relative abundance (r) and constancy values(c) for each species collected at different altitudes of mount Japfu from April 2010 to March 2011 38

Table 4: Simpson Index (D) according to the altitude of the mount Japfu 39

Table 5: Monthly collection record of different *Drosophila* species collected at an altitude of 1500 m a.s.l of mount Japfu along with the meteorological data from April 2010 to March 2011 40

Table 6: Monthly collection record of different *Drosophila* species collected at an altitude of 1800 m a.s.l of mount Japfu along with the meteorological data from April 2010 to March 2011 41

Table 7: Monthly collection record of different *Drosophila* species collected at an altitude of 2100 m a.s.l of mount Japfu along with the meteorological data from April 2010 to March 2011 42

Table 8: Monthly collection record of different *Drosophila* species collected at an altitude of 2400 m a.s.l of mount Japfu along with the meteorological data from April 2010 to March 2011 43

Table 9: Monthly collection record of different *Drosophila* species collected at an altitude of 2700 m a.s.l of mount Japfu along with the meteorological data from April 2010 to March 2011 44
Table 10: Wing indices of *Drosophila hegdi*

Table 11: Estimation of Evolutionary Divergence between COI sequences of *D. melanogaster, D. jambulina, D. vulacna* and *D. hegdi*

Table 12: Maximum Likelihood Estimate of Substitution Matrix with reference to *D. hegdi*, *D. jambulina, D. vulacna* and *D. melanogaster*

Table 13: Estimates of Base Composition Bias Difference between Sequences of *D. melanogaster, D. jambulina, D. vulacna* and *D. hegdi*

Table 14: Altitudinal variations in the frequencies of various inversions arrangements as found individually and in combinations in 11 different populations of *D. ananassae* of Nagaland

Table 15: Observed, expected and Chi-square values of 2LA, 3LA and 3RA inversion heterozygotes of *Drosophila ananassae*

Table 16: Correlation analysis of inversion frequencies on climatic and Geographical variables

Table 17: Correlation analysis of inversion frequencies of 2LA on climatic and geographical variables

Table 18: Correlation analysis of inversion frequencies of 3LA on climatic and geographical variables

Table 19: Correlation analysis of inversion frequencies of 3RA on climatic and geographical variables
