ACKNOWLEDGEMENT

It transcends all the barrier of written words to thank my distinguished, mentor and supervisor Dr. Sunil Kumar, Deputy Director (Sr. Grade), Dept of Histochemistry, National Institute of Occupational Health, Ahmedabad. My belief at the inception of this inestimable innovative venture, that with his eye for perfection, critical observation, enthusiasm to materialize ideas and knowledge regarding the subject would guide me through various trials and tribulations during this study has lead me to this destination of mine. His capacity to combine critique with an immediate empathy and commitment towards his students will always inspire me.

I am extremely grateful to Dr. H. N. Saiyad, Director, National Institute of Occupational Health, Ahmedabad, for kindly permitting me to work in his esteemed and well-equipped institution.

I am also grateful to Professor Dr. B.S. Jathal, Dean, Govt. Dental College and Hospital, Ahmedabad for the continuous support and permission to use the facilities of the college and hospital for this study.

My special thanks to Dr. Pankaj Sangwan and Dr. Purvi Vashi for their invaluable help and assistance.

A word of appreciation to Dr. Prabhudas Patel, Dr. Mihir Shah, Ms. Minal Mankad, Dr. Dhiren Ahir, Dr. Sayma Memon, Dr. Nimit Gandhi and Dr. Alpa Vora.

A collective acknowledgement is given to all the staff of the Dept. of Histochemistry, NIOH. Warmest thanks to Mr. Yogendra Verma, for his valuable assistance.
Thanks to Dr. N. G. Sathwara (SRO, NIOH) who took time out of his busy schedule for assisting in metal analysis work.

The statistical analysis would have been mind boggling without the help of Mr. P. K. Kulkarni (Dy. Director, NIOH) who patiently worked with me to sort out and analyze all the data. I thank him for his sincere efforts.

I would like to mention the unflinching love and support of my wife and sons who have always been a source of inspiration to me. They have always stood by me through thick and thin at all times, bolstering my moral and courage.

I offer my appreciation to all the patients who willingly cooperated with me as subjects for my study.

I wish to acknowledge the help extended by all those people who were directly or indirectly responsible for the completion of this study.

Last but not the least, I would like to thank the omnipresent Almighty for giving me the will and perseverance to complete this task.

Thank you SAI.

(Girish Parmar)
