ACKNOWLEDGEMENT

I take this opportunity to express my hearty thanks to Dr. (Miss) C. L. Bhatt, Reader in Education, University School of Psychology, Education and Philosophy for giving a valuable guidance inspite of her extremely busy life.

Thanks are due to the Heads of Schools without whose co-operation this work would not have been a success. I cannot forget those smiling innocent faces submitting themselves as the 'Guinea-Pigs' in this research work. Their happy memory will be the most valuable treasure for me.

I am also indebted to the authorities of the Physical Research Laboratory, Ahmedabad for making available the computation facilities at a highly concessional rate. Without this, the development of the tool would have been rather incomplete.

Lastly, I extend my thanks to my relatives and friends who have inspired and helped me throughout the period of the present investigation.

Ahmedabad
December, 1972

L. K. P.
