## LIST OF TABLES

**Table 1:** Lists the biotinylated lectins used for the study, their concentration and incubation time.

**Table 2:** List of primary antibodies and their respective secondary antibodies used for the study, their concentration and incubation time.

**Table 3:** List of the primer sequences used in Real time PCR

**Table 4:** List of the PCR conditions for shRNA amplification.

**Table 5:** Summary of identified galectin-3 binding proteins.

**Table 6:** Summary of identified L-PHA binding proteins.

**Table 7:** Comparison of modified N-glycosylation sites of identified proteins.
