ACKNOWLEDGEMENTS

It gives me great pleasure in expressing my gratitude to all those people who have supported me and had their contributions in making this thesis possible. First and foremost, I must acknowledge and thank The Almighty God for blessing, protecting and guiding me throughout this period. I could never have accomplished this without the faith I have in the God.

I express my profound sense of reverence to my supervisor and promoter Prof. Dr. Suresh Chandra Satapathy, for his constant guidance, support, motivation and untiring help during the course of my PhD. His in-depth knowledge on a broad spectrum of Computational Intelligence topics has been extremely beneficial for me. He has given me enough freedom during my research, and he has always been nice to me. I will always remember his calm and relaxed nature, and the way he asks “YES! How can I help you?”, whenever I start to talk with him over phone. I am thankful to the Almighty for giving me a mentor like him.

I express my deepest gratitude to my co-supervisor Prof. Dr. K. Parvathi, KIIT University, Bhubaneswar for boosting my morale throughout the course of research. She has always been caring, a source of wisdom and motivation. She is a great leader.

I would also like to thank the members of my Doctoral Committee, Dr. S.S. Nayak (Dean R & D), Dr. Anita Patra (Dean SOET, PKD), Dr. S. Sarangi(HOD, Physics Jatni Campus), Dr. Anubha Ray(Coordinator) for annually reviewing my work and for giving me positive feedback. Special thanks to Dr. D. N. Rao (Vice Chancellor of CUTM) and Dr. M.L. Narasimham (Dean, Academic Research) for accepting my submission of this thesis.

I can’t imagine my current position without the love and support from my family. I thank my parents, Mr. Tejraj Naik and Mrs. Malli Naik, for striving hard to provide a good education for me and my siblings. I always fall short of words and felt impossible to describe their support in words. If I have to mention one thing about them, among many, then I would proudly mention that my parents are very simple and they taught me how to lead a simple life. I would simply say, “Maa, Baa you are great!”.

My sisters Mithila bai, Menaka bai and Surama bai, and brothers, Sunil Naik, Kapileswar Naik are great friends of mine. I would like to thank them for guiding me throughout. My sisters-in-law Susmita Naik, and brothers-in-law Nilamani Patel were also supportive. I acknowledge my nephew Swadhin and Samarth and my niece Ashisha for their affection to keep my mind cool always.

One person who has always been ready to help me was Dr. Pratibha Tripathy, Prof. in Physics Dept. CUTM Paralakhemundi. She is just like my sister. I will always be grateful to her for helping me to develop patience and good attitude within me. Thank you Madam for all your support! I am also more thankful to her mother (Mausi) for motherly care towards me.

Last but not the least I would like to remember and thank my best friend C Pradeep Kumar for his constant inspiration throughout my PhD career. His support in every respect helps me to complete my PhD work early.

Many more people have touched my life in many wonderful ways. I would like to convey my sincere appreciation and heart-felt gratitude to one and all.

Anima Naik
