ACKNOWLEDGEMENTS

To begin with, I pay my utmost obeisance for the Almighty, who from his treasure of mercy blessed me with the capability and strength to bring a successful end to this endeavor.

I offer my heartiest thanks and deep sense of gratitude to Dr. Moinuddin, Associate Professor in Botany, Women’s College, Aligarh Muslim University, Aligarh, for his skilled supervision, keen interest and constructive criticism that he showed throughout the tenure of the research work. Indeed, without his able guidance and scholarly navigation this dissertation would have been mere a dream.

I also owe my deep sense of gratitude to Prof. Arif Inam, the Chairman, Department of Botany, Aligarh Muslim University, Aligarh, for providing me all the necessary facilities to carry out my research work and also for his unremitting encouragement all through the way of this success.

It would be lack of decency on my part if I forget to thank my lab colleagues Miss. Hena Irshad, Miss. Afshan Naaz, Miss. Seema Sahay and Miss Neha Pathak for their support and timely assistance throughout the course.

I feel short of vocabulary to express my thanks from the innermost core of my heart to my seniors Dr. Naeem, Mr. Mohd Idrees, Mr. Yusuf, Mr. Nadeem Hashmi, Mr. Irfan, Mr. Tariq Aftab and Miss. Aiman Hassan for their generous help and precious suggestions.

My friends Mr. Jamsheed Ahmad, Mr. Safiuddin Ansari and Mr. Suhail Ahmed deserve all the appreciation and profuse gratitude who supported me through all possible means and presented their valuable advice throughout.

Last but not the least, I express my humble feelings and gratitude to my ever-loving parents and my brother Mr. Muzaffar Ali, who endowed me with enormous encouragement and moral support during the course of the research work.

(SAJAD HUSSAIN)
