ACKNOWLEDGEMENT

I kneel before almighty ALLAH to thank Him for the benevolence He has shown to this humble slave and for bestowing upon me the ability to comply with His first command "IQRA" (Read).

I wish to accord most sincere thanks to my research supervisor Prof. Mohd. Mushtaq, who not only suggested the research problem and gave me able guidance but also helped me learn the meaning of "IQRA" more by example than the precept. He knows the art of getting the best out of his students without letting them feel burdened.

A feeling of sadness overwhelms me when I remember late Prof. M. S. Ahmad, a brilliant teacher and dedicated researcher. He kept his interest alive in teaching and research until his last moment. He was a role model for our team.

I am highly thankful to Prof. M. Ilyas, former Chairman, Prof. Saeeduzzafar Qureshi, Chairman, Department of Chemistry, A.M.U. and Prof. Shafiullah for providing inspiration and facilities necessary to complete the work.
I can hardly repay the kindness and cooperation offered by my friends and research colleagues, Dr. Methab Perveen, Dr. Jamal Firoz, Dr. Uzma Naseer, Mr. Salman Hashmi, Mr. Jamal A. Khan, Ms. Rakshanda Rehman and Ms. Sheeba Shafi.

Thanks are due to CDRI Lucknow for providing NMR and Mass Spectra and Miss Huma Naseer for typing out the manuscript with professional skill and personal interest.

A strong feeling of gratefulness emanates from my heart for my loving parents and all other family members. They have always given the encouragement and moral support needed during this period. Special words of thanks are due to my husband Dr. Athar A. Khan, who went through the manuscript quite painstakingly in order to minimize the errors and bring it in its present shape.

Financial assistance from A.M.U. as Departmental fellowship is also acknowledged.

(AFREEN SHAMIM)
