Acknowledgement

My first word of deep gratitude goes to the Almighty of the Universe, who gave wisdom and ideas which helped me at every stage to bring out this thesis, as nothing can be done without His help.

It is my privilege to express my gratitude and appreciations to my supervisor, Prof. Muslim Taj Ahmed, Principal, Z.H. College of Engineering and Technology, AMU, Aligarh. Inspite of busy schedule as Principal, involving academic and administrative, still he gave his valuable time for useful suggestions, motivating, criticism, occasional appreciations and careful corrections in the Thesis. I am deeply indebted to him for all the help in many ways, not all of which can be adequately acknowledged here.

My respectful thanks are to Prof. Z. A. Abbasi, Chairman, Electronics Engineering Department, for his cooperation and support throughout the research work. It is also my pleasure to express sincere gratitude to Prof. Muzaffar Ahmed Siddiqui of Electronics Engineering Department, for his valuable advice and useful discussions. He never hesitated to spend time to help me throughout the course of this work, inspite of his busy schedule, as a Proctor; AMU. I would like to mention a special thanks to Prof. I. A. Khan, Department of Electronics and Electrical Engineering, University of Niswa, Oman, for giving some important suggestions related to the organization of the Thesis.

I am highly obliged to Prof. S. S. Rajput, Dean, ABV-Indian Institute of Information Technology and Management, Gawalior, for his encouragement and useful discussions related to the device models in the early stages of the work.

I would like to express my gratitude to my parents for their good wishes, blessings and encouragement, which has always been an inspiration for me. I
have immense pleasure to acknowledge my brothers and sisters for their good wishes and affection during the preparation of the Thesis. Specially to my brother, Prof. Mohd Jamilur Rahman Khan of Electronics Engineering Department, for his help and encouragement. He has been very cooperative in the painful job of proofreading of the final manuscript.

I owe a deep sense of appreciation to my affectionate husband, Mr. S. Iftikhar Naqvi for his good wishes, patience and understanding during the entire work of the Thesis. It gives a pleasure for me to acknowledge my loving sons, Omair and Abdullah, for their good wishes and patience they have shown during my long work hours.

I am also thankful to my colleagues, of the Department of Electronics Engineering, for their good wishes and moral support.
