ACKNOWLEDGEMENT

It is my pleasant duty to express my heartfelt thanks and appreciation to my teacher and senior colleague Professor S. Aliul H. Rizvi now serving in the Jamia Millia Islamia University, New Delhi, without whose motivation and help this work would not have been possible. He has helped in every stage of my research, from the inspiration to carry out research, to giving suggestions on solving problems when they came up, he has been there whenever I needed him.

I would like to thank Professor A. A. Nizami, Chairman, Department of Mechanical Engineering, for the facilities he provided in the department and for the personal interest he took in the progress of my research.

I would also like to place on record the help that has been rendered by Professor M. Qasim Rafiq, Chairman, Department of Computer Engineering, who notwithstanding his busy schedule always had time to look into and resolve any issue worrying me.

Mr. M. Hasan, Reader, Department of Electronics Engineering, has helped me in the preparation of response measurement system design and through lengthy discussions has helped in clarifying many concepts of great importance to my work. I do not have words to properly thank him for all his help.

Mr. Abid A. Khan and Mr. Qasim Murtaza, Lecturers, Department of Mechanical Engineering, deserve my thanks for helping me out at both the academic and personal levels.

Mr. M. Iftikhar, Mr. M. Faisal, Mr. Saeeduddin and Mr. M. Zaheer, Technical Assistants, Faculty of Engineering & Technology, deserve my thanks in fabricating the model of my design, which has been of great value in my analysis.

I would also like to thanks all my colleagues and all those who helped at various stages of my research, for their understanding and cooperation.

Last, but not the least, I would like to thank Mr. M. Shahid Siddiqui who typed this thesis in record time and without whose diligence this work would have been delayed.

(Mohd. Muzammil)
