Acknowledgment

At first, I would like to record my gratitude to my beloved parents who always support me in my life and especially during my stay in India. Undoubtedly, the full credit of this entire thesis goes to my beloved guide, Prof. Dr. G. Arun Maiya; I gratefully acknowledge for his supervision, advice, and consistent guidance from the very early conception of this research till this point as well as his extraordinary experiences & support throughout the work. His truly scholar intuition has made him as a constant oasis of ideas and passions the field, which exceptionally inspire and enrich my growth as a student, a researcher and a clinician want to be. I am indebted to him more than he knows.

I thank my beloved Dean Dr. B Rajashekar for his constant support and reassurance to face any difficulty in my journey.

I consider it an honor to work with Prof Dr. R Padma Kumar, Head of Department of Cardiology whose consistent direction, guidance and warm welcome made a possibility for me to learn and increase my knowledge on every day basis. I extend my thank to Dr Tom Devasia, Dr Nitin Kansal, Dr Ranjan Shetty, Dr Vivek in department of cardiology as well as Exercise Test & Echocardiography units for their complete co-operation & understanding. I would like to recall my word of thanks to the late Prof. Arun Kusugal who gave me the permission to start the research under department of Cardiology at the beginning.

It is my great pleasure to thank Dr Ganesh Kamath, Head of Cardiothoracic Surgery department and Dr Shirish Borkar for their help and support.

I owe my deepest gratitude to Dr B Shad and Dr F Mirbolouk from Department of Cardiology of Golsar Hospital in Iran for their warm acceptance to co-operate with us, complete support and providing all necessary facilities.
for me in Golsar Hospital to conduct the research in Iran successfully. It was an honor to work with them and their team in Golsar Hospital and I extend my thanks to Dr Azizollah Zadeh, the manager of Golsar Hospital, for his warm permission to us to conduct the study in their center.

I would like to thank Mrs S Alidoust, Mrs M Monfaredi, physiotherapists of department of Physiotherapy of Golsar Hospital and Mrs M Gholipour; cardiac nurse of Golsar Hospital who without their everyday support and help completing the study in Iran’s center was difficult. I wish to extend my thanks to Exercise test and Echocardiography unit of Golsar Hospital for their everyday support, and arrangements.

Undoubtedly no research could be completed without any statistics and I would like to extend my gratitude to Prof. N S Nair, HOD, Dr Binu VS, and Mr V Guddattu from dep. of Statistics of Manipal University for their complete guidance from early to end of study.

Last but not the least, I would like to express that this thesis would not have been possible unless the entire necessary fund of the project was supported by Armaghan Educational Institute and I offer my regards to the chairman.

Finally, I would like to thank everybody who helped me in successful realization of this thesis, and express my apology that I could not mention personally one by one.

Place: Manipal
