List of Tables

Table 4.1. Baseline characteristics of subjects with respect to primary outcomes; pooled data from two centers

Table 4.2. Clinical characteristics and risk factors of subjects at base line; Pooled data from both centers

Table 4.3. Socioeconomic characteristics of subjects at baseline; Pooled data from both centers

Table 4.4. Changes of PCS & MCS components of Quality Life SF36 from base-line to post-intervention in Study & Control groups; Pooled data from both centers

Table 4.5. Changes of mean of subdomains of SF 36 from baseline to post-intervention in Study & Control groups; Pooled data from both centers

Table 4.6. Changes in LVEF from baseline to post-intervention in Study & Control groups in both centers

Table 4.7. Changes in Functional Capacity (MET level) from baseline to post-intervention; pooled data from both centers

Table 4.8. Changes in BMI, Waist circumference and skinfolds measurement from baseline to post-intervention in Study & Control groups; Pooled data from both centers

Table 4.9. Baseline characteristics of subjects with respect to primary outcomes in center I; India

Table 4.10. Clinical characteristics and risk factors of subjects at base line in center I; India

Table 4.11. Socioeconomic characteristics of subjects at baseline in center I; India

Table 4.12. Changes of PCS and MCS components of Quality of Life SF36, from baseline to post-intervention in Study & Control groups in center I; India

Table 4.13. Changes of subdomains of SF 36 from baseline to post-intervention in Study & Control groups in center I; India

Table 4.14. Changes in LVEF from baseline to follow up after 3 months in center I; India
Table 4.15. Changes in Functional Capacity (MET level) from baseline to post-intervention in Study & Control groups in center I; India

Table 4.16. Changes in BMI, and Waist circumference and skinfolds measurement from baseline to post-intervention in center I; India

Table 4.17. Baseline characteristics of subjects with respect to primary outcomes in center II; Iran

Table 4.18. Clinical characteristics and risk factors of subjects at base line in center II; Iran

Table 4.19. Socioeconomic characteristics of subjects at baseline in center II; Iran

Table 4.20. Changes in PCS and MCS components of Quality of Life SF36, from baseline to post-intervention Study & Control groups in center II; Iran

Table 4.21. Changes of subdomains of SF 36 from baseline to post-intervention in Study & Control groups in center II, Iran

Table 4.22. Changes in LVEF from baseline to post-intervention in Study & Control groups in center II; Iran

Table 4.23. Changes in Functional Capacity (MET level) from baseline to post-intervention in Study & Control groups in center II; Iran

Table 4.24. Changes in BMI, and Waist circumference and skinfolds measurement from baseline to post-intervention in center II; Iran
