ACKNOWLEDGEMENTS

It is insurmountable to acknowledge all that one owes to ones benefactors, however, few words would be in order.

I wish to express my sentiments and immeasurable debt to my revered supervisor Dr. Absarul Hasnain, Section of Genetics, Dept. of Zoology, A.M.U. Aligarh. His resolute guidance and perseverance throughout the progress of this work was the veritable stimulus. His scientific knowledge and methodological perspectivism have crucially contributed to the formulation of this thesis. I obediently offer my sincere gratitude to him.

I would like to thank profusely to Professor Jameel Ahmad Khan, Chairman, Dept. of Zoology for his valuable advice, concern as well as for providing the necessary laboratory facilities.

The help extended by Late Prof. Wajih Ahmad Nizami, Prof. Asif A. Khan, Dr. A. L. Bilgrami, Dr. S.M. Abbas Abidi, Dr. Asim Azfar, Dr. Gul Ahmad, Dr. Khalid Saifullah, Dr. Nyamat Ali and all other teachers of the department is gratefully acknowledged.

The benevolence of Dr. Tariq M.Haqqui of Case Western Reserve University, Cleveland and C. Sequiko Hasnain deserve due recognition and thanks.

I owe special thanks to my Lab colleagues Mr. Rakesh Babu Panday, Syed Hasan Arif, Mumtaz Jabeen, Riaz Ahmad and Sheeba for their concrete suggestions, constructive criticism and indispensable aid during the entire course. The friendly atmosphere of the Lab greatly facilitated the completion of this work.

I must thank the appreciation and moral support extended by my friends, Mrs. Talat Hilal, Shema wasi, Parveen Qamar, Nikhat Khursheed, Farhana Taqi, my seniors and juniors.
I am grateful to the support staff of Zoology department, Mr. Shakir Ali, Mr. Prempal for their assistance, to KGN and ANGLO Computers for their quick and impeccable typing, to New Art Studio and Mr. Salman for their skillful development of photographs and to UGC-GATE for furnishing financial assistance.

My mother Mrs. Noor Jahan Begum has constantly showered her affection on me. In such a situation silence rather than eloquence is a more appropriate response. I am beholden to her from the deep of my heart. Moral support, cooperation and encouragement rendered by my uncle, Mohd. Alimuddin; brothers, Habibun Nabi, Nasir Nabi and sisters, Nuzhat Ahmad, Nusrat Shah and in particular Nudrat Nabi whose sacrifices and affection for me have been of paramount importance.

I am deeply indebted to my family for their patience and support whilst I have spent many hours in the laboratory rather than with them, specially to my son Abdul Kashif Shah who suffered the agónies of my absence for long hours.

I deem it my immense pleasure in expressing my profound acknowledgement to my husband Abdul Hai Shah whose unwavering encouragement and cooperation at every stage made it possible to finish this thesis despite my various responsibilities.

(NIKHAT NABI)
