ACKNOWLEDGEMENT

GOD governs the world and we have only to do our duty wisely and leave the issue to Him. GOD, who has planned for me this long journey of research and this journey, would not have even moved an inch forward without the help of the Providence. He has shown me the path, offered ample challenges to make me strong mentally, introduced me to failures to taste the sweetness of success. He has kept me going despite all adversities and with His innumerable blessings I am able to convert my dream of completing a research in the field of education into a reality. Thanking Him would not only be futile but also impossible. I can just pray to Him and seek His blessings in all the things I do.

Dreaming of undergoing a research is a magnum opus for a Teacher. But mere thoughts would never suffice in completing this kind of mammoth projects. For this, one needs a proper planning, well chocked out strategies and above all a brain to help out ones thoughts into execution. I am blessed to have one such mind behind my Research. Shri Yagya Vrat Shrivastava, is a God send Supervisor to me. He is a Teacher, Philosopher and Guide to me. His foresightedness, his depth of knowledge, her ability to teach – everything helped me to complete my research. Right from the time of choosing the topic, till the completion of this research, he offered his expertise to me, despite his own professional and personal involvements. He never let me down and to work under his able guidance itself is a huge learning experience for me. I thank my supervisor Shri Yagya Vrat Shrivastava, for what he is and what he has made me.

I offer my heartfelt gratitude to the Principal of Kalyan P.G. Mahavidyalaya for his support and who has granted me permission to choose this prestigious institution as my Research Centre. I thank him for his encouragement and blessing.
As we advance in life we learn the limits of our abilities. I was born ordinary but it is because of my parents that I would be able to add feathers of success to my cap. It is because of their upbringing, their early lessons, their scolding. I thank God for giving me such parents and I am too mortal to say thanks to my parents. I can just seek their blessings for years to come.

Research in Education involves lot of field work, interaction with school children, collection data of various schools and other related tasks. I sincerely thank all the Heads of the Institutions to generously extend their support and lending me move freely in their institution to collect important data and vital information for my research.

For a project to see its day it needs a proper environment and that kind of conducive environment I got in my work place - St. Vincent Pallotti College. Being a reputed institution it has always thrived on the theory of achieving the best through relentless efforts. I offer my sincere thanks to the Director, Principal and other heads in the management to extend their support in completion of this research. It is because of their motivation and encouragement that I have taken up this project and have successfully completed it.

Working with some very experienced, senior colleagues has proved a great help for me. I thank all my colleagues in supporting me directly or indirectly in completing my research. My sincere thanks to every word of encouragement they spoke, for the extended helping hand in times of trouble and the kind of mental support that they have provided me.

There are people and there are friends. God made our friends to share our feelings. I am blessed to have a friend like Dr. M. Vani. She has been my shoulder all through my project. She has guided me, scolded me, laughed with me, and wept
with me. Without her support I would have never been able to complete this research. Although she would not approve my idea of thanking her, but then this acknowledgment would be incomplete without thanking her.

I extend my sense of gratitude to all the members of my Godavarti family. Every one in the family extended their share of support and encouraged me in bringing this project to the present shape. Let the blessing of elders should continue to shower on us for ever. A special note of thanks to my brother, my sister and their families.

Any number of words of thanks for Mr. N.B. Rao, my husband will fall short because without his support I would have never been where I am. Despite being in a completely different profession he extended every bit of support that was possible in his part to help me out in completing my research. I am happy that I have done this for him. I thank him for being my best half.

My daughter Megha, and son Parth, need a special mention in this acknowledgement, for it is their support that I am able to complete my research despite working full time both in home and in professional work. They had to at times bear an enforced exile due to my studies and I thank them for bearing all these hardships. A Million thanks to my children.

This acknowledgement would go on and on still there would be so many left to thank. If I have forgotten any one, it’s not deliberate but due to my short memory. I offer my sincere thanks to every one.
