LISTS OF TABLES

Table 1
Clinical trials conducted till date for cancers of the lung.

Table 2
Clinical trials for cancers of the lung with all known studies on adjuvant therapy

Table 3
Distribution of peptides that show varying behavior on EGF and Erlotinib treatment

Table 4
Signaling proteins identified in the phosphotyrosine enrichment experiment

Table 5
Signaling proteins identified in the serine/threonine enrichment experiment

Table 6
Phospho sites observed in the ERBB family of receptors along with the enrichment protocol and phosphorylation status.

Table 7
List of kinases identified from both phosphotyrosine enrichment, phosphoserine/threonine enrichment and from the phospho RTK antibody arrays

Appendix Table A
List of peptides that were activated or remain unchanged on EGF but were dephosphorylated on Erlotinib treatment.

Appendix Table B
Numbers of molecules that were characterized based on molecular class.
