ACKNOWLEDGEMENT

I am greatly indebted to the intellectual herald and doyen of the Department of Botany, Dr. Lokendra Singh under whose unimpeachable guidance and ungrudging supervision, I pursued my research work. His analytical brain in unravelling the spectrum of problems has no parallel in this part of the region.

Needless to add, the constant help of various dimensions of Dr. S.S. Gaurav, Department of Biotechnology and Dr. S.S. Lal, Retd. Professor in Zoology C.C.S. University extended to me was a perennial source of my advanced studies and accelerated inspiration. Thanks are also due to Principal & Head of Botany Meerut College, Meerut.

Last but not least, this dissertation would not have been completed in record time but for the loving care and encouragement of my parent Sri Kanti Parsad Sharma & Mother Vadahi Sharma & family members who always spurred and kept me on the tenterhooks for plodding through this formidable task.
