1. **Objectives**

3.1 **Study the fetal chromosomal pattern in genetic amniocentesis** with references to indication.

3.2 **Correlation will be made with indication and expected chromosomal pattern.**

3.3 **Unexpected chromosomal findings will be analyzed for likely clinical outcomes.**

[Methodology for conducting these studies is provided on the following page.]

*All the case selection and counseling will be given by sticking to the norms of ethical and legal issues as per the PCPNDT act (1994 and 2003)*
