ACKNOWLEDGEMENTS

I am immensely grateful and highly indebted to my respected teacher and supervisor Prof. Sarada Kanta Sarma, Department of Botany, Gauhati University, who introduces me in this interesting and promising field of river ecology. Through his insight, research steeped intellect and dedication; he carved a path on which I have followed my journey of learning and expression. It is a great pleasure for me to acknowledge his patience, encouragement, affection and enthusiastic supervision for the entire period of research.

It is my duty to record my indebtedness to Dr. D. K. Jha and other faculty members, non teaching staff of the department of Botany, Gauhati University for their excellent cooperation.

I am thankful to University Grants Commission, New Delhi as well as very grateful to Dr. Debojit Baruah, Botany Department, Lakhimpur Girls’ College, Dr. Lakhi Prasad Hazarika, Zoology Department, North Lakhimpur College, Dr. Sabita Borah of Lakhimpur Girls’ College, Dr. M. Pandit, Principal, Lakhimpur Girls’ College, Prof. S. P. Biswas, Dibrugarh University for their support and encouragement at different stage in my research work.

I would like to express my sincere gratitude and love to many of my friends and colleagues, my parents, brother and sisters. I wish to acknowledge my gratitude to all the family members of Gauhati University & Lakhimpur Girls’ College, whose inspiration enabled me to complete the present work. I am also obliged a deep sense of thanks to Sri Bikramaditya Bakalial, Project Fellow, Department of Zoology, Lakhimpur Girls’ College for his assistance during the field study.

Words alone are not sufficient to express all feelings and finally I thank all the people who have shared their wisdom. I have received considerable help and support from many people during this study and it is not possible to name and thank all of them individually in a few words. However, I wish to remember all of them and express my deepest gratitude.

(RANJIT DUTTA)
