Contents

1. Introduction 1

Objectives. 12

2. Literature Review. 13

   Study area. 33
   Sampling. 35
   Collection and Preservation. 39
   Documentation. 40
   Recording odour. 40
   Chemical test. 41
   Macro morphological feature. 41
   Spore prints. 41
   Micro morphological features. 42
   Identification. 42

4. Results.

   Taxonomic Enumeration of macrofungi. 44
   Macrofungi recorded from the study area. 76
   Macrofungi recorded from different Reserve Forest of the study area. 78
   Frequency of occurrence of macrofungi. 81
Density of macrofungi. 84

Habitat and substratum of macrofungi. 92

Occurrence of macrofungi in different substrata. 93

Effect of rainfall on occurrence of macrofungi during 2010 – 2012. 94

Study of spore prints, odour and chemical test of macrofungi. 95

Study of basidia and basidiospore, ascus and ascospore of macrofungi. 96

Study of gills structure and pores and presence/absence of volva, annulus. 97

Uses and importance. 100

Edible macrofungi used by different ethnic groups with their local names. 101

Nomenclature changes of Macrofungi 102

5. Discussion 104

6. Summary and conclusion 114

7. References 118
