Acknowledgements

I would like to take the privilege of extending my deep sense of gratitude and indebtedness to the supervisor and guide of the present study, Dr. Umesh Ch. Goswami, Professor, Department of Zoology, Faculty of Science, Gauhati University, for planning the programme of this work, for his scholarly guidance, constant inspiration and affectionate encouragement during the course of this investigation and preparation of the manuscript.

I acknowledge my indebtedness to Prof. A. Dutta, Prof. D. K. Sarmah, Prof. R. K. Bhola, Prof. K. Dutta and Prof. J. Kalita of the Department of Zoology, Gauhati University for valuable suggestions and keen interest throughout the pursuit of the present research work.

It is a great pleasure to record my thanks to the honourable Vice-Chancellor, Gauhati University, Dean, Faculty of Sciences, Registrar and other officials of the university for the academic and administrative facilities extended to me.

I could not have successfully come up with the results without the invaluable guidance rendered by Dr. Manik Ch. Debnath, Programme Coordinator, Krishi Vigyan Kendra, Lower Subansiri, ICAR, Arunachal Pradesh. I owe him many thanks.

I would like to extend thanks to Dr. Uttam Kumar Barua, Programme Coordinator, Krishi Vigyan Kendra, Goalpara, ICAR, Assam, Dr. Bibha Chetia Borah, Senior Scientist, Fisheries Research Centre, Assam Agricultural University, Jorhat, Assam, Dr. Pranjyoti Sarmah, Associate Professor, College of Fisheries, Raha, Nagaon, Assam Agricultural University, Dr. Indu, Programme Coordinator, Krishi Vigyan Kendra, Tawang, Arunachal Pradesh, for their useful suggestions, wholehearted encouragement, extensive help and cooperation during the entire period of study.
Respectful thanks are extended to the scientists of Food Processing and Enzymes Engineering Division of Bhabha Atomic Research Centre (BARC), DAE, Trombay, Mumbai, India, for irradiation of the experimental samples (Shidols); Dr. K. Bhaskarachary of the National Institute of Nutrition, Hyderabad, for his assistance and critical discussion for estimation of amino acids and fatty acids composition of fresh fishes and Shidols; the staff of the GB Pant Institute of Himalayan Environment and Development, NE Unit, Itanagar, Arunachal Pradesh, for analysis of the physico-chemical and microbiological parameters to study the quality of experimental samples; Dr. Tarun Ch Borah, Biotechnology Division, North East Institute of Science and Technology (NEIST), Jorhat, Assam, for analyzing the microbial quality of the irradiated Shidol samples; the Head of the Department of Botany, Rajiv Gandhi University, Doimukh, Naharlagun, Arunachal Pradesh, for allowing me to work on the microbiological analysis.

I am thankful to all the fishing communities of the North eastern states for providing information regarding the traditional preparation of the fermented fish products of the region.

I sincerely acknowledge Dr. P. Borah, Professor, Department of Microbiology, College of Veterinary Science, Assam Agricultural University, Khanapara, Guwahati, for the care and help rendered to me by carrying out all the statistical analysis of my research work.

I convey my gratitude to the Director, Directorate of Agriculture, Govt. of Arunachal Pradesh, for permitting me to submit the thesis for fulfillment of the requirements for the Ph. D. degree.

The facilities provided by the Library of the Department of Zoology as well as the Central Library, Gauhati University, are also gratefully acknowledged.

I would like to extend thanks to my seniors Debeswar Borah, Rupak Nath, Deepjyoti Barua and Himangshu Talukdar for their unconditional help
and support. It is very satisfying for me to offer my sincere thanks to Bapan, Ditul, Pronob, Dipesh, Rajdeep, Jitumoni, Parimita, Khargeswar, Ridip and Jiaur for their generous help and support rendered to me, together with Pushpendra Saroj, Yowa Nunu, Hage Munth, Mudang Tana, Hage Yania for their constant encouragement and support.

The constant support, inspiration and blessing of my parents, uncle and aunt were a great motivating factor, which helped me to complete my research work efficiently. I thank them from the core of my heart.

It gives me an immense sense of joy and satisfaction when I remember the contribution of my wife, Banima, for her active participation, wise opinions and suggestions, moral support and the tremendous motivation rendered to me. Without her contribution it would have been virtually impossible for me to complete the research work in the desired manner.

I can never repay the generosity bestowed upon me by sisters Rijumoni (Dangor vanti), Swapna (Maju vanti), Bhanita (Phulan), Bhabanita (Mainu), Papi (Munukon) and my brother Kishor for their support, generous help and whole hearted co-operation during the entire period of study.

Date: June, 2013
